

Autistic Hierarchy of Needs:

A guide for working therapeutically with autistic adults

Claire V. M. Evans-Williams and Damien J. Williams

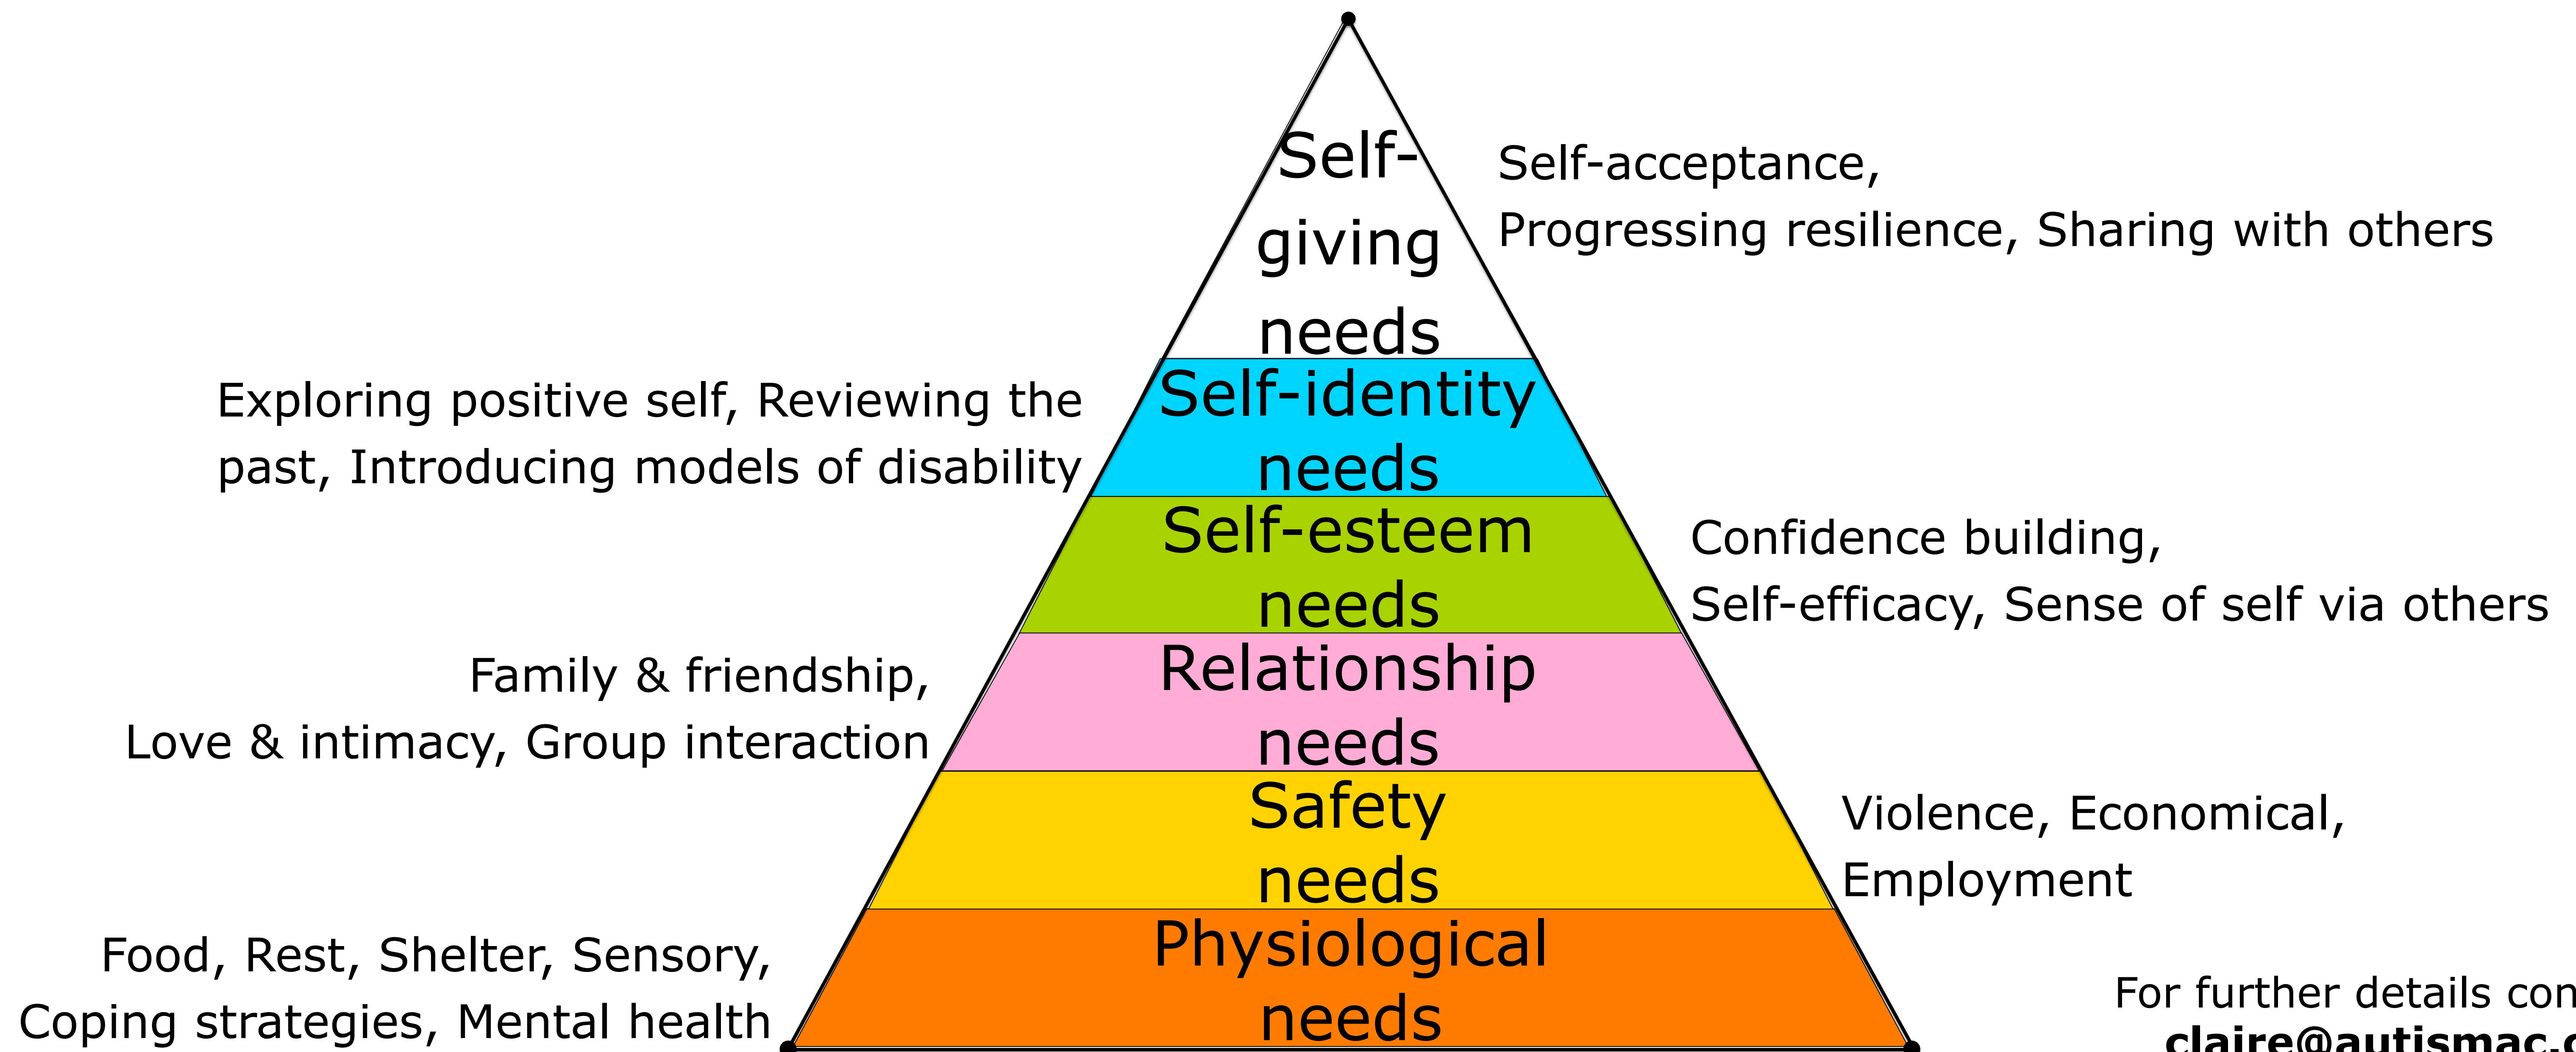

PROBLEM

There is currently a lack of guidance for working therapeutically with autistic adults (see SIGN 145), which poses a significant threat to their health and well-being.

TAAUK RESOLUTION

Work collaboratively with autistic adults to identify and address their needs.

The Autistic Hierarchy of Needs is based on Psychologist Abraham Maslow's 6-level hierarchy of needs model.
