

In the name of (de)securitization: Speaking security to protect migrants, refugees and internally displaced persons?

Faye Donnelly

Faye Donnelly is a Lecturer in the School of International Relations at the University of St Andrews. She is the author of *Securitization and the Iraq War: The Rules of Engagement in World Politics* (Routledge, 2013). Her article, 'The Queen's Speech: Desecuritizing the Past, Present and Future of Anglo-Irish Relations' has been published in the *European Journal of International Relations*. Her work has also appeared in edited volumes, *E-International*, *openDemocracy* and an *LSE Blog*.

Abstract

A guiding concern of this article is to examine how the protection of migrants, refugees and internally displaced persons (IDPs) is being spoken about and framed. Today it is evident that the dominant responses of sovereign States to each of these groups is heavily reliant on the language of security and (de)securitization. Indeed, this article openly conceptualizes ongoing attempts to protect migrants, refugees and IDPs as a series of overlapping (de)securitized games. At least three arguments follow from this claim. First, adopting this approach serves as a reminder that the ways in which different groups of people are spoken about often constitutes a dividing line between life and death. A second point illustrated here is that the language games of (de)securitization are not identical when it comes to protecting different groups. Third, using securitization as the theoretical point of departure provides a timely reminder that none of the three categorizations listed above is guaranteed to apply. On the

contrary, the adoption of each linguistic label – migrant, refugee, IDP – is subject to and dependent upon audience acceptance. Remembering the latter dimension is imperative to fully comprehend the ongoing contestations and countermoves currently underway to respond to people moving in search of security. By way of conclusion, this article contends that far more attention must be paid to broader understandings of acceptance and love to ensure the protection of migrants, refugees and IDPs.

Keywords: securitization, migration, refugees, internally displaced persons, , language game, acceptance, love.

Speaking on world Refugee Day last year, Barack Obama surmised that, “The scale of this human suffering is almost unimaginable; the need for the world to respond is beyond question”.¹ Unfortunately this was not an isolated summation. Presenting the most ‘unprecedented’ level of displacement that has ever been on record, in 2016 the United Nations High Commissioner for Refugees (UNHCR) estimated that, “65.3 million people around the world have been forced from home”.² A staggering 21.3 million of these people were said to be refugees. Although these dire numbers are alarming, it is necessary to foreground they are precisely that; numbers, calculations, statistics, figures and estimates.

This is not to suggest that numbers do not matter. For many scholars they are inherently political and powerful modes of governance.³ However, when it comes to calculating the scale and costs of what the then United Nations Secretary-General, Ban Ki-Moon termed a “crisis of solidarity” in 2016⁴, it is not enough to simply think or talk in terms of numbers. On the contrary, as the Secretary-General emphasized elsewhere, “we must change the way we talk about refugees and migrants. And we must talk with them. Our words

⁴ Ban Ki-Moon, “Refugee Crisis about Solidarity, Not Just Numbers, Secretary-General says at event on Global Displacement Challenge”, 15 April 2016, available: <http://www.un.org/press/en/2016/sgsm17670.doc.htm>.

and dialogue matter”.⁵ In a similar fashion, Pope Francis told members of the United States Congress that, “we must not be taken aback by their numbers, but rather view them as persons, seeing their faces and listening to their stories, trying to respond as best we can to their situation”.⁶

With these calls in mind, a guiding concern of this article is to examine how the protection of migrants, refugees and internally displaced persons (IDPs) are being spoken about and framed. Today it is evident that the dominant responses of sovereign States to each of these issues is heavily reliant on the language of security and (de)securitization.⁷ Indeed, this article conceptualizes ongoing attempts to protect migrants, refugees and IDPs as a series of (de)securitized “games”.⁸ At least three arguments follow from this claim. First, adopting this lens reminds us that the ways in which we speak about and categorize different groups of people often constitutes a dividing line between life and death. A second point illustrated here is that the language games of (de)securitization are not identical when it comes to protecting different groups. Third, using securitization as the theoretical point of departure provides a timely reminder that the three discursive labels under consideration are not guaranteed to apply. . Quite the reverse. As will be seen below, the adoption of each linguistic label - migrant, refugee, IDP - is subject to and dependent upon audience acceptance. Remembering the latter dimension is imperative to fully comprehend ongoing contestations over how to respond to people moving in search of security.

The remainder of this article is divided into six sections. The first section is devoted to exploring how agents are speaking security to frame migrants, refugees and IDPs. To get to the crux of these narratives, however, it may be necessary to move beyond discussions of ‘security unbound’ and catastrophic crises.⁹ Section two outlines the securitization framework created

⁵ Ban Ki-Moon, “General Assembly Adopts Declaration for Refugee and Migrants, as United Nations, International Organisation for Migration Sign Key Agreement”, 19 September 2016, available at: <https://www.un.org/press/en/2016/gal1820.doc.htm> .

⁷ When readers see (de)securitization in the text they should take it is an indication that the author means both securitization and desecuritization.

⁸ The concept of a ‘game’ has multiple meanings in securitization studies. This article draws directly on Ludwig Wittgenstein’s language game approach when it employs this term.

⁹ Within International Relations and critical security studies there is singular consensus on what ‘speaking security’ means. Given that security is a contested term, there is no single way to speak security. As I show in Section 1, some scholar suggest that speaking security pertains to an unbound set of practices whilst others think that it pertains to catastrophic crises. In this article, my focus on ‘speaking security’ stems in part from the emphasis that the Copenhagen School and their securitization framework place on the role of speech acts in the social construction of security. I also adopt this grammar to explore how agents speak security during ongoing and entangled language games, as well as in wider contexts. The latter point echoes claims made by second generation

by the Copenhagen School and amended by ‘second generation’ scholars to demonstrate the power of security speech, moves and practices. The next three sections are dedicated to exploring how migrants, refugees and IDPs are (de)securitized. The third section questions the promise of using securitization as an analytical lens for mapping varied patterns of migration. Using this discussion as a springboard, section four scrutinizes whether the securitization of migration informs how refugees are labelled, treated and protected. A quick look at countries openly pursuing policies that securitize migrants reveals that complications are already establishing themselves in how the two words, migrant and refugees, have become synonymous with each other. The fifth section turns the arrow of analysis towards IDPs. The question raised here is whether these groups of peoples are silenced by the (de)securitization games unfolding as this piece is being written. The sixth section discusses the prospects of leaving our current games of (de)securitization behind to create alternative narratives to see the faces of migrants, refugees and IDPs, to listen to their stories and try to respond to their situations.

Unbound securitization and crises? Rethinking security speech, moves and practices

Established scholars have already illustrated that the language of security plays an extremely powerful role in separating those who are worthy of protection and those who are not, those who are like ‘us’ and those who are not, those who threaten ‘us’ and those who do not, lives that matter and those that do not.¹⁰

Yet the language of security can take a variety of forms. Following Ludwig Wittgenstein, the meaning of the word “security” depends on how it is used.¹¹ Evidently, this

securitization scholars, who contend that ‘speaking security’ is an iterative and interactive practice rather than a single speech act. For two excellent insights into how to conceptualise security as a contested concept see Matt McDonald and Lee Wilson, “Trouble in Paradise: Contesting Security in Bali”, *Security Dialogue*, Vol. 48, No. 3, 2017 and Thierry Balzacq, “*Contesting Security: Strategies and Logics*”, Routledge, London.

¹⁰ There is a rich body of work on this topic that cannot be captured here or relegated solely to the field of security studies. See Giorgio Agamben, *State of Exception*, University of Chicago Press, Chicago, translated by Kevin Attel, 2005; Judith Butler, *Precarious Lives: The Power of Mourning and Violence*, Verso, London, 2006; Judith Butler, *Bodies that Matter: On the Discursive Limits of ‘Sex’*” Routledge, New York, 1993; David Campbell, *Writing Security: United States Foreign Policy and the Politics of Identity*, University of Minnesota, Minneapolis, 1998; Roxanne Lynn Doty, *Imperial Encounters: The Politics of Representation in North-South Relations*, University of Minnesota, Minneapolis, 1996; Jenny Edkins, Véronique Pin-Fat and Michael J. Shapiro, *Sovereign Lives: Power in Global Politics*, Routledge, New York, 2004; Lene Hansen, *Security As Practice: Discourse Analysis and the Bosnian War*, Routledge, London, 2006; Edward W. Said, *Orientalism*, Penguin, London, 2003.

¹¹ Ludwig Wittgenstein, *Philosophical Investigations*, 3rd edition, Blackwell, Oxford, translated by G.E.M Anscombe, 1974.

term can refer to something quite specific (like having enough clothing) to something more ambiguous (like shadow economies). According to Jef Huysmans, security is ‘unbound’ since it appears to be scattered everywhere, proliferating and rupturing in multiple directions all at once.¹² Paradoxically, as his work shows, the political effect of this unbinding is the diffusion of insecurities. Concurrently, a wider field of research has highlighted that the language of catastrophic risks, arresting dangers and apocalyptic crises have become common parlance when it comes to defining what security means and does.¹³ The point of importance here is that references to unbound securities produce a picture of arresting complexity. Arguably, they also create a ‘void’ that actors rush to fill in order to “regulate the meaning of unfolding events”.¹⁴ Yet these attempts seem problematic for two reasons.

First, no complete ‘void’ ever really exists. Even when they face the most catastrophic crisis - whether it is a ‘migrant’, ‘refugee’ or an ‘IDP crisis’ - actors do not inherit a blank slate from which to restart. Hence, there is no bright line separating the discursive practices that exist before a catastrophe and those that are used to make sense of it thereafter. All of a sudden, security is not always unbound, at least not in the sense of any definitive rupture.¹⁵ Instead it has to exist within certain limits, irrespective of how ambiguous, porous and blurry these may be. To be clear, this piece is not suggesting that security discourses are somehow predetermined or rigid. If anything, the central argument advanced here illustrates that we are not permanently beholden to pre-existing vocabularies. Nonetheless, what should be avoided is equating the language of crises writ large with an unlimited ability to make security anew each time a catastrophic event appears on the scene. While media headlines throw the spotlight on unbound securities, the meaning of security does not always change at the same momentum. Nor should it. As such, it is necessary to push beyond snapshots that simply show us the ‘newest’ or ‘latest’ security crisis. In the process, we can appreciate the intricate ways in which unbound securities

and catastrophic crises frequently rely on and even quote what Brent J. Steele terms ‘critical security narratives’.¹⁶ At the risk of overstating the point, certain residues of meaning continue to matter in ways that are often hard to understand and explain if we only concentrate on the creation of ‘voids’, ‘catastrophes’ and ‘unbound securities’.

It is here that the second fundamental concern surfaces. Crisis after crisis, there tends to be a synergy, a momentum, a rallying call for the implementation of heightened securitized measures. More pointedly, these calls continue to occur even when securitization is already in play. Consequently, one process of securitization appears to breathe life into another. These modes of resuscitation do not have to be identical or complementary. As often happens, occasionally they will overlap, and at other times they will diverge. Either way, it can be acknowledged that these encounters can be joined together to create larger and intertextual narratives.¹⁷ To take stock of these landscapes, a number of scholars have turned to concepts like resecuritization¹⁸ or macrosecuritization.¹⁹ In different ways, both concepts deal with the

¹⁶ Brent J. Steele, “Maintaining (US) Collective Memory: From Hiroshima To A Critical Study of Security History”, *Critical Studies of Security*, Vol. 1, No. 1, 2013; Brent J. Steele, “Critical Security and History”, *Critical Studies of Security*, Vol. 3, No. 3, 2015. According to Steele Critical Security History reveals, “several functions of historical narratives”. He also contends that it is based on the question of, “What do dominant narratives of a historical event or process tell us about the subject at hand – the speaker, the community they are in, and beyond?” citations taken from Steele, 2015, p. 305; italics in original.

¹⁷ James Der Derian and Michael J. Shapiro, “*International/InterTextual Relations: Post-Modern Readings of World Politics*”, Lexington, Lexington Books, 1989. Lene Hansen’s account of one icon quoting another is also very useful in thinking about this point. See Lene Hansen, “How Images Make World Politics: International Icons and the Case of Abu Ghraib”, *Review of International Studies*, Vol. 41, No. 2, 2015, p. 269.

¹⁸ Resecuritization does not have a concrete definition in securitization studies. The promise of this concept is that it leaves open a possibility that (de)securitization processes can evolve and change over time. The most common example of resecuritization provided in the literature is an instance where an issue that was desecuritized becomes securitized again. However, arguably, resecuritization can also occur without a securitization process ever ending. In short, it does not just signal a shift from desecuritization back into securitization. For instance, it is possible that as a securitization process adapts, evolves and intensifies resecuritization will occur to maintain and preserve the game(s) in play. This discussion points to an overlapping potentiality: that institutionalization may constitute a modality of resecuritization. Finally, it is also possible for readers to consider that modes of resistance, contestation and counter-securitization can entail strands of resecuritization. These are just some examples of where we may find resecuritization in operation. However, further research is needed to flesh out this concept. For an entry point to this topic see Matt McDonald, “Deliberation and Resecuritization: Australia, Asylum-Seekers and the Normative Limits of the Copenhagen School”, *Australian Journal of Political Science*, Vol. 46, No. 2, 2011; Luca Mavelli, “Security and Secularization in International Relations”, *European Journal of International Relations*, Vol. 18, No. 1, 2011; Fabrizio Tassinari, “The European Sea: Lessons From the Baltic: Sea Region for Security and Cooperation in the European Neighbourhood”, *Journal of Baltic Studies*, Vol. 36, No. 4, 2005; Patrick Lebond, “Globalization and World Insecurity”, *International Studies Review*, Vol. 7, No. 4, 2005; Stefano Guzzini, “Foreign Policy Identity Crises and Uses of the ‘West’”, *DIIS Working Paper*, No.5, 2015.

¹⁹ Macrosecritization relates to the construction of security constellations and securitization processes that bundle and/or hierarchically arrange lower level securitization processes. See Barry Buzan and Ole Wæver, “Macrosecritisation and Security Constellations: Reconsidering Scale in Securitization Theory”, *Review of International Studies*, Vol. 35, No. 2, 2009. Barry Buzan, “Will the ‘Global War on Terrorism’ be the New Cold War”, *International Affairs*, Vol. 82, No. 6, 2006; Juha A. Vuori, “A Timely Prophet? The Doomsday Clock as a Visualization of Securitization Moves with a Global Referent Object”, *Security Dialogue*, Vol. 41, No. 3, 2010; Scott D. Watson, “Macrosecritization and the Securitization Dilemma in the Arctic”, *Critical Studies on Security*, Vol. 1, No. 3, 2013; James Sperling and Mark Weber, “NATO and the Ukraine Crisis: Collective Securitization”, *European Journal of International Security*, Vol. 2, No. 1, 2017.

intricate ways that securitization can evolve to organize and bundle, “relations around the most powerful call of a given time”.²⁰ Indeed Scott D. Watson carves out space for us to study, “an intensification of humanitarian securitization”.²¹ Going a step further, Amir Lupovici introduces the concept of “securitization climax” to unpack situations in which, “actors attempt to justify taking more intensive and exceptional measures than those previously accepted by the target audience”.²² There can be little doubt that these perspectives foster a more holistic understanding of the wider contexts in which security threats emerge and evolve.

However, there are still causes for concern. On the one hand, overarching narratives of this scale may imply that security crises are unending and, by extension, that securitization processes are unbound. They may also ensure that catastrophes become a normal part of our everyday realities. In sync, the exception continues to become the rule.²³ In some times and places this picture comes close to reality. Even so, it is worth pondering how productive it is to speak incessantly of catastrophic crises and never-ending threats, and whether the persistent use of these terms makes them difficult to leave behind.²⁴ It is easy to imagine the devastating effect of an escalating macrosecuritization that is bundling crisis after crisis together into a compound cluster. The so-called ‘global war on terror’ is an excellent example. To study this enormous meta-narrative is to find one securitized agenda breathing life into elongated chain of other security agendas in ways that were never anticipated, not even by its architects. At present there appears to be no point of saturation. No sign of securitization fatigue or overload. Instead, what can be found is that as more and more security discourses are linked together through this macrosecuritization, it becomes harder to unmake.²⁵ This kind of outcome

²⁵ Stephen Graham raises an important insight into how the war on terror has morphed by exploring processes of imitation and appropriation. As a result, his account illustrates that war on terror has not only evolved from a U.S.

overlaps with Lene Hansen and Helen Nissenbaum's discussion of hypersecuritization in the cyber sector.²⁶ As they note, "what distinguishes hypersecuritization from 'mere' securitization is their instantaneity and inter-locking effects".²⁷ Paying attention to these trends raises a flag of concern about moving from one securitized "game" to another without taking a critical step back to explore the configuration or consequences of these larger constellations. Simply put, we must think more about how to leave the language of securitization behind if it continues to grow. This raises more nuanced questions. What happens if securitization becomes unbound? What happens when macrosecuritization becomes hypersecuritized? Can we desecuritize macrosecuritized games and hypersecuritized processes? At which level do we attempt to desecuritize such multi-layered constellations first?

To address these questions, let us first conceptualize securitization and then examine how it shapes discourses on how to protect migrants, refugees and IDPs.

Constructing (De)Securitization: The Copenhagen School

The Copenhagen School and their securitization framework has gained enormous currency in critical security studies. At base, they provide a way to study the social and discursive construction of security.²⁸ Inspired by the work of John L. Austin, the Copenhagen School contends that saying security does something. More specifically, they argue that speaking security constitutes a securitizing move that frames certain referent object(s) as an existential threat.²⁹ This means that security threats are not fixed or objective. Instead they must essentially be understood as discursive articulations of threatened 'we' identities.³⁰ Although securitizing speech acts and moves takes centre stage in the Copenhagen School's framework,

perspective over time. In sync, the war on terror has escalated as other actors have strategically learnt how to adapt this language game for use in a different context. His ideas of active learning, shared practices and even overt mimicry is worthy of future research. See Stephen Graham, "Laboratories of War: United States-Israeli Collaboration in Urban War and Securitization", *Brown Journal of World Affairs*, Vol. 17, No. 1, 2010. For a financial take on the idea of mimicry and the final process of securitization see David Bassens, Ewald Engelen, Ben Derudder and Frank Witlox, "Securitization Across Borders: Organizational Mimicry In Islamic Finance", *Journal of Economic Geography*, Vol. 13, No. 1, 2013.

²⁶ Lene Hansen and Helen Nissenbaum, "Digital Disaster, Cyber Security, and the Copenhagen School", *International Studies Quarterly*, Vol. 53, No. 4, 2009.

²⁷ *Ibid.*, p. 1164.

²⁸ According to the Copenhagen School anyone can study and create security. However, they also suggest that elite actors, such as politicians, will have more authority, power and potential to speak security.

²⁹ B. Buzan *et al.*, above note 24, p. 21-25.

³⁰ *Ibid.*, p.120; Also see Jarred Hayes, "Identity and Securitization in the Democratic Peace: The United States and the Divergence of Response to India and Iran's Nuclear Programs", *International Studies Quarterly*, Vol. 53, No. 4, 2009.

audience acceptance is said to determine whether securitizing moves fail or succeed.³¹ A major reason why so much emphasis is placed on audience acceptance collapses back into their claim that securitization is an intersubjective and socially constructed process. In equal measure, it supports their suggestion that, “security should be seen as a negative, as a failure to deal with issues as normal politics”.³² This possibility might pique curiosity. Does securitization not symbolise a positive outcome?³³

In certain circumstances, the Copenhagen School maintain that securitization is “unavoidable”.³⁴ Within such circumstances, securitization can potentially be viewed as a positive outcome given that with audience acceptance it empower actors to break free of rules that would otherwise be bind them to eliminate the given threat.³⁵ However, according to the Copenhagen School, securitization has “problematic side effects”.³⁶ Precisely because securitization has the power to take issues into the realm of the extraordinary and silence contesting voices, they maintain that more security is not always better.³⁷ Rather, the Copenhagen School casts desecuritization as the “optimal long-range option” to move issues “out of this threat-defense sequence and into the ordinary public sphere”.³⁸ Although the latter concept is contested, Jef Huysmans presents it as an avenue for ‘unmaking’ the fabrication of any security threat that arose in the process of securitization.³⁹ According to Thierry Balzacq, Sara Depauw and Sarah Léonard a general consensus exists within the literature that desecuritization, “ought to be sought on the grounds that it would normatively better than

Vuori, “Security, Resilience and Desecuritization: Multidirectional Moves and Dynamics”, *Critical Studies on Security*, Vol. 3, No. 3, 2015; Faye Donnelly, “The Queen’s Speech: Desecuritizing the Past, Present, Future of Anglo-Irish Relations”, *European Journal of International Relations*, Vol. 21, No. 4, 2015.

securitization”.⁴⁰ In effect, desecuritization signals that securitization was not intended to be unbound.

Reconstructing securitization: Introducing second generation scholars

Continued discussions about what securitization is and how it can be applied reinforce the maxim that words gain their meaning in use.⁴¹ According to second generation scholars, securitization is best understood as a continuous process of negotiation, contestation and resistance.⁴² For those orientated towards these more ‘sociological’ approaches, concentrating solely on the semantic side of a security utterance at a single moment in time is too limited.⁴³ Instead, they focus on what security speech acts do and, in turn, how the meaning of security can change as securitization unfolds. They also consider what happens when multiple speakers and audiences canvas different and partial viewpoints. In parallel, ‘second generation’ scholars

⁴⁰ Thierry Balzacq Sara Depauw and Sarah Léonard, “The Political Limits of Desecuritization: Security, Arms Trade, and the EU’s Economic Targets”, in Thierry Balzacq (ed.), *Contesting Security: Strategies and Logics*, Routledge, Abingdon, 2015, p. 104, italics in original.

⁴¹ This observation is already spelt out for us by the Copenhagen School in the original text when they note that, “the meaning of a concept lies in its usage”. B. Buzan et al, above note 24, p.24.

⁴² Second generation securitization studies represent a huge and still emerging canon of work which cannot be covered here. have started with the question of silence.⁴⁴ Others still have begun to fold images⁴⁵, videogames⁴⁶, emotions, feelings and sensations⁴⁷ into securitization studies.

Taking these broader insights seriously has led many ‘second generation’ scholars to conceptualize securitization as a ‘game’.⁴⁸ Encapsulating this stance, Juha A. Vuori describes it as a, “type of political game constituted by moves and countermoves”.⁴⁹ Another suggestion of a game has been put forward by Holger Stritzel and Sean C. Chang to conceptualize counter-securitization. From their point of view securitization is, “as a game of moves and counter-moves in a communicative struggle of adversarial wills”.⁵⁰ Envisioning securitization as a game illustrates that the beginning and ending of (de)securitization processes are not clear cut. Instead, they can unfold without a fixed script, sound or rhythm. However, there is no uniform definition of what counts as a ‘game’ within securitization studies.⁵¹ .⁵² This article draws on the concept of a language game outlined by Ludwig Wittgenstein in *The Philosophical Investigations* to contribute to debates conceptualizing games of (de)securitization.⁵³ This is

⁴⁴ See Lene Hansen, “The Little Mermaid’s Silent Security Dilemma and the Absence of Gender in the Copenhagen School”, *Millennium – Journal of International Security*, Vol. 29, No. 2, 2000.

⁴⁵ It has become increasingly common for leading securitization scholars to examine the role of images. For further readings see Michael C. Williams, “Words, Images, Enemies: Securitization and International Politics”, *International Studies Quarterly*, Vol. 47, No. 4, 2003; Lene Hansen, “Theorizing the Image for Security Studies: Visual Securitization and the Muhammad Cartoon Crisis”, *European Journal of International Relations*, Vol. 17, No. 1, 2011; Juha A. Vuori, “A Timely Prophet? The Doomsday Clock as a Visualization of Securitization Moves with a Global Referent Object”, *Security Dialogue*, Vol. 41, No. 3, 2010.

⁴⁶ See Mark B. Salter, “The Geographical Imaginations of Video Games: Diplomacy, Civilization, America’s Army and Grand Theft Auto IV”, *Geopolitics* Vol. 16, No. 2, 2011; Felix Ciută, “Call of Duty: Playing Video Games with IR”, *Millennium – Journal of International Studies*, Vol. 44, No.2, 2016.

⁴⁷ Emotions and feelings have begun to be studied within securitizations. For interesting insights see Thierry Balzacq, above note X; Eric Van Rythoven, “Learning to Feel, Learning to Fear? Emotions, Imaginaries, and Limits in the Politics of Securitization”, *Security Dialogue*, Vol. 46, No. 5, 2015; Ludvig Norman, “Theorizing the Social Foundations of Exceptional Security Politics: Rights, Emotions and Community”, *Cooperation and Conflict*, Online First View, 2017: DOI: [10.1177/0010836717716722](https://doi.org/10.1177/0010836717716722). To date, sensations are less well studied in security and securitization studies. For an interesting insight on this dimension see Claudia Aradau and Rens Van Munster, above note 12, p 85-106.

⁵¹ For most second generation scholars the concept of a game does not have a single definition. To date it has tended to be tied to their idea of ongoing ‘practices’ of contestation.

⁵² For insights into this topic see, among others, Gavan Duffy, Brian K. Frederking and Seth Tucker, “Language Games: Dialogical Analysis of INF Negotiations”, *International Studies Quarterly*, Vol. 42, No. 2, 1998.

⁵³ L. Wittgenstein, above note 8..

not to suggest that Wittgenstein's approach is flawless⁵⁴ or that his language game approach is the only way we can conceptualize 'games' in securitization studies. For Wittgenstein, however, the presence of alternative pathways are always welcome as readers continue to 'look and see' how security, and securitization, is spoken, enacted and altered.

Language games and games of (de)securitization

Studying Wittgenstein's later writings highlights that he considers language games to be an interactive activity. More specifically, he presents language as a "form of life".⁵⁵ Developing this line of argument enables Wittgenstein to show that language is embedded in and constitutive of human actions and interactions.⁵⁶ Put differently, "the term language-game is meant to bring into prominence the fact that the speaking of language is part of an activity, or of a form of life".⁵⁷ Building on these themes, Wittgenstein presents the concept of "meaning in use"⁵⁸ to describe how a word, like securitization, becomes meaningful in the process of play. This insight has ramifications for how we understand securitization since, "saying something is an important step, one which must then be constantly put into use to remain in existence".⁵⁹ To talk of 'meaning in use' also introduces multiplicity and overlaps since any word can acquire a different set of meanings in the course of play. Moreover, the meanings in one language game can come to crisscross with another language game, which, in turn, can also come to crisscross with another and so forth. In short, meanings are layered. To capture these pluralistic dimensions Wittgenstein adopts the term "family resemblances".⁶⁰ This idea explains how security can mean shadow economies and having enough clothes simultaneously. It is crucial to note that Wittgenstein rationale does not only allow for a single word to have multifarious meaning. He also allows for players to undertake multiple moves within a single game on the one hand, whilst participating in more than one game on the other. Adding another layer of analysis, Véronique Pin-Fat notes that, "the people with whom we are in relation may also be in motion, moved to change themselves".⁶¹

⁵⁴ Arguably a language game approach is haunted by the priority it places on language rather than more visual and material dimensions of speech. However, a closer reading of Wittgenstein's approach demonstrates that it allows for interrelations between these aspects.

⁵⁵ L. Wittgenstein, above note 8, §23, p. 11.

⁵⁶ A daily exchange of greetings would be an example of how language is a form of life.

⁶¹ Véronique Pin-Fat, "Writing Narrative As Ethics and Philosophy in International Relations: Reflections on a Difficulty in Writing a Research Monograph", *Journal of Narrative Politics*, Vol. 3, No. 1, 2016.

Taking cue from Wittgenstein, then, the limits of any language game are never secure since the flow of the game can always be changed. Nevertheless, they are never totally unbound. Conversely, within every single language game agents draw on rules “as a *matter of course*”.⁶² The idea of rules being obeyed, followed and used does not mean they cannot be disobeyed, broken or thrown away. Nevertheless, Wittgenstein maintains that rules are always present since we cannot “know how to go on” without them.⁶³ This represents another important change in how we conceptualise securitization.⁶⁴ Whilst securitized games are presented as a set of practices that empower players to break free of rules that would normally hold, Wittgenstein maintains that there will always be some kind of rules in operation, even when security is spoken and securitizing moves are accepted. At the very least “departing from one set of rules or interpreting them differently requires some form of justification”.⁶⁵ Meanwhile actions that plainly break the rules of one game without any justification can be penalized.

Whether taken individually or collectively, Wittgenstein’s insights help us to appreciate how the protection of migrants, refugees and IDPs can come to gain multiple meanings in certain language games. What he also helps us to realize is that rules are in jeopardy if we allow actors to break them without any consequences.⁶⁶ Worse still, words and rules can become meaningless if we repeatedly fail to put them into use.

The securitization of migration: A *fait accompli*?

This section taps into debates surrounding the securitization of migration in order to problematize storylines that depict this process as a *fait accompli*. The logic that migrants pose a threat to the national security is now a prominent technique employed by states to manage their territorial borders. As Philippe Bourbeau notes, “the movement of people is provoking worldwide anxiety and apprehension and casting long-established questions of cultural identity,

⁶² L. Wittgenstein, above note 8, §238, p. 87, italics in the original.

⁶³ L. Wittgenstein, above note 8, §179, p. 73.

⁶⁴ For further discussion on the role of rules in securitization see B. Buzan *et al.*, above note 24, p. 25-26; Faye Donnelly, above note 32, p. 56-60; Michael C. Williams, above note 20, p. 217—218; Jonathan Bright, “Securitization, Terror and Control: Towards a Theory of the Breaking Point”, *Review of International Studies* Vol. 38, No. 4, 2012.

⁶⁵ Faye Donnelly, above note 32, p. 83.

⁶⁶ Drawing on Wittgenstein’s writings it is possible to conceptualise international law and codified conventions established to protect migrants, refugees and IDPs as language games that abide by specific sets of rules. For further reading on this connection see Wouter Werner, “What is Going On? Reflections on Kratochwil’s Concept of Law”, *Millennium* Vol. 44, No. 2, 2016; Friedrich Kratochwil, *The Status of Law in World Society: Mediations on the Role of Rule and Law*, Cambridge University Press, Cambridge, 2014; Norman Malcolm, “Wittgenstein on Language and Rules”, *Philosophy* Vol. 64, No. 247, 1989.

belonging, and security into a state of uncertainty”.⁶⁸ Similar views have been articulated by key political figures in the United Kingdom (UK). As then Home Secretary Theresa May quipped, large-scale migration made a “cohesive society” impossible.⁶⁹ Adopting a more securitizing tone towards migrants and refugees living in makeshift camps in Calais, David Cameron, then Prime Minister, maintained that there is, “a swarm of people coming across the Mediterranean, seeking a better life, wanting to come to Britain because Britain has got jobs, it’s got a growing economy”.⁷⁰ The campaign slogans championed by political parties backing ‘Brexit’ have escalated matters.⁷¹ As Nigel Farage’s UK Independence Party anti-immigration poster maintained, the nation was at “breaking point” and “the EU had failed”.⁷²

Yet there is nothing in the broadest arc of these tales that deviates from the securitization of migration taking place in other countries. Among ‘western’ societies alone, a long list of comparisons can be drawn, ranging from the United States of America to Australia to Greece.⁷³ Hence, as Scott D. Watson points out, “the association of human migration with insecurity is not new”.⁷⁴ Against this backdrop, signs are emerging to suggest that the securitization of migration is now *a fait accompli*...

Adopting a language game perspective, however, it is worth remembering that this type of account is misleading for several reasons. First, nothing is ever a *fait accompli* since words can change meaning, for better or worse, in the course of play. Second, paying attention to Wittgenstein’s concept of multiplicity shows that migration is not a crisis for all migrants. In short, not all migrants are being labelled as a security threat. Instead, the securitization of migration creates multi-layered processes of identification and discrimination between those

deemed to have entered through the ‘regular’ channels as opposed to those who have entered through ‘illegal’ or ‘irregular’ ones.⁷⁵ The presence of this discursive layering and labelling challenges claims that the securitization of migration is a *fait accompli*. Third, oversimplifying the securitization of migration blinds us to who migrants are. Framing migrants as a security threat creates and reproduces negative stereotypes of external groups. On closer inspection, these modes of identification fray in reality. . Indeed, William Lacy Swing, the General Director of the International Organization for Migration (IOM) has calculated that “one in every seven of us is a migrant”.⁷⁶ Even this statistic, however, diverse groups of migrants are being homogenized, helping to maintain a singular and anonymized ‘other’. Fourth, omnipotent securitized narratives about migrants are making it difficult for alternative narratives to be heard. Certainly across Europe, perceptions of migration have changed significantly, as country after country has moved to close or restrict their borders. As a result, hateful speech about, s and violent actions against, migrants has undoubtedly risen.⁷⁷ A report produced by the Danish Institute of International Security also maintains that the assumptions that, “refugees are vulnerable to radicalization” and that “refugee flows” provide “a backdoor for terrorists” are gaining political momentum.⁷⁸ As we will see below, these speech acts, moves and practices jeopardize the protection of many refugees trying to escape violence. Finally, the securitization of migration prompts us to wonder out loud (or in silence) how to leave securitized games behind. This matters given that ongoing attempts to desecuritize migration are under duress.⁷⁹

The securitization of refugees: A contradiction in terms?

In theory, the securitization of migration should have absolutely no bearing on the protection of refugees. On the contrary, labelling someone as a refugee should ensure that they are never framed as an existential threat. To borrow from the poem “Home” by Warsan Shire “You have to understand that no one puts children in a boat unless the water is safer than the land”.⁸⁰ Abiding by various iterations of international refugee law, when a person is awarded refugee status, it should automatically entitle them to rights and protections. It should also automatically endow the international community with responsibilities to watch over them. These principles are why the UNHCR was created in 1950 and why the Refugee Convention⁸¹ was approved by the United Nations in 1951.⁸²

However, these simple creeds are not always reflected in practice.⁸³ One reason, at least in part, for this stems from the escalation of securitized games in operation to manage internal and external migration flows. The deal struck between the European Union and Turkey on 18 March 2016 is a case in point.⁸⁴ Here we find that one securitized game is breathing life into another. Apart from simply framing migrants as threats, this deal represents a toxic form of discursive osmosis that has attempted to recast both refugees and asylum seekers as threats rather than people who are threatened.⁸⁵ Although the words “migrant” and “refugee” are now held to share family resemblances, they do not abide by the same sets of rules..

Take for example, the international law principle of *non-refoulement*⁸⁶ which categorically prohibits States from returning refugees and asylum seekers to any territory where

⁸⁰ This poem resonated with many audiences around the world. It was largely (re)tweeted and used as part of a charity single/song to raise awareness about the refugee crisis. For access to the entire poem and information about how it was circulated see Martha Bausells and Maeve Shearlaw, “Poets Speak Out For Refugees: ‘No One Leaves Home, Unless Home is the Mouth of a Shark’”, *The Guardian*, 16 September 2015, available at: www.theguardian.com/books/2015/sep/16/poets-speak-out-for-refugees-.

⁸⁵ See Alexandria J. Innes, “When the Threatened Become the Threat: The Construction of Asylum Seekers in British Media Narratives”, *International Relations*, Vol. 24, No. 4, 2010; Saskia Lewllyn, “Testing the Solid in Solidarity: An Examination of Why the Ongoing Refugee Crisis is the Most Important Challenge Facing the EU”, *Quarterly Access - Australian Institute of International Affairs*, Vol. 9, No. 3, 2016.

⁸⁶ As Cordula Droege, amongst others, notes the principle of *non-refoulement* is codified in refugee law, extradition treaties, international humanitarian law and international human rights law. Within these legal frameworks there is also some variation to the persons this principle protects. For further discussion see Cordula Droege, “Transfers of Detainees: Legal Framework, Non-Refoulement and Contemporary Challenges”, *International Review of the Red Cross*, Vol. 90, No, 871, 2008,; Jean Allain, “The Jus Cogens Nature of Non-

their security will be jeopardized and where they have reason to fear persecution. This principle stands in sharp contrast to ongoing attempts to deny asylum claims before they are fully processed.⁸⁷ It also prohibits moves undertaken to send refugees and asylum seekers home or to detention centres whilst they are in transit. In effect, the creation of such securitized agendas signals a contraction in terms and a growing redundancy for the legal apparatus that is meant to safeguard their protection. Looking ahead, these trends are alarming since they may also signal the construction of a new set of rules for determining who “counts” as a refugee and what protections they should be afforded.

There is one scenario where securitization could be linked to protecting refugees and asylum seekers. It is one in which refugees are allowed themselves to be the speakers and the international community to be the audience.⁸⁸ In this case the game shifts gears. Technically, it would allow refugees and asylum seekers to speak security to frame the State they are fleeing from as an existential threat. Under international law, the power of these speech acts stems from their ability to allow refugees and asylum seekers to break free of rules that would otherwise bind, like crossing a national borders without a passport, a residence permit, a piece of jewellery or a penny to their name. This, however, is where the workings of unbound securitization games and crises resurface. A distressing lesson to learn from the so-called ‘refugee crisis’⁸⁹ is that audiences⁹⁰ require more convincing than they should when it comes

Refolement”, *International Journal of Refugee Law*, Vol. 13, No. 4, 2002; Aoife Duffy, “Expulsion to Face Torture? Non-Refolement in International Law”, *International Journal of Refugee Law*, Vol. 20, No. 3, 2008.

⁸⁷ As the migration and refugee crisis in Europe have escalated, for example, the European Union has introduced several bureaucratic procedures and tougher rules to manage the flow of people into this territory. In July 2016, this organization has openly stated that, “asylum seekers moving to other EU countries after arriving in Europe will face having their applications for international protection rejected”. For the further information on the EU procedures see James Crisp, “Refugees Face Asylum Rejection if they Leave Country of Arrival, Under New EU Rules”, Euractiv, 13 July, 2016, available at: <https://www.euractiv.com/section/global-europe/news/under-new-eu-rules-refugees-face-asylum-rejection-if-they-leave-country-of-arrival/>; Natascha Zaun, *EU Asylum Policies: The Power of Strong Regulating States*, Palgrave Macmillan, 2017. I am grateful to Natasha Saunders for advising me to put stronger emphasis on this point.

⁸⁸ Obviously it is also possible that the international community and humanitarian organizations, like the UNHCR or the International Committee of the Red Cross, to securitize refugees as a way to safeguard their right of survival. Here again their securitizing moves are dependent on audience acceptance from host states. On this point see Jocelyn Vaughn, “The Unlikely Securitizer: Humanitarian Organizations and the Securitization of Indistinctiveness”, *Security Dialogue*, Vol. 40, No. 3, 2009. Also see Anne Hammerstad, “UNHCR and the Securitization of Forced Migration”, in Alexander Betts and Gil Loescher (ed), *Refugees in International Relations*, Oxford, Oxford University Press.

⁸⁹ The term ‘so-called’ is deliberately used here to draw attention to the active construction of this discursive label and to problematize the naturalization of coining these refugee flows as a ‘crisis’.

⁹⁰ The fact that there is not a singular audience listening to these claims adds another layer of complexity that has hampered many claims for asylum. Technically, the international community writ large is one audience that a refugee speaks to when they make their claims for protection and humanitarian assistance. Host governments and their populations are two other audiences listening to and processing their asylum claims. For analytical purposes however I prefer to retain some degree of anonymity when discussing the audiences since there are often many audiences in play that do not neatly fall into official categories.

to accepting speech acts and securitizing moves undertaken by refugees and asylum seekers. For example, as the ‘refugee crisis’ has escalated audiences want further clarifications. As a result refugees are asked with increased frequency to prove that ‘their’ claims for asylum are legitimate. To verify that ‘they’ are not a migrant or terrorist. To provide evidence that ‘they’ came through the correct channels. To confirm how long do ‘they’ wish to stay This is not the end of the process since audiences weighing up the legitimacy of these speech acts and securitizing move then proceed to check whether ‘they’ will overtax their refugee quota and calculate how much it will cost to resettle ‘them’ and ‘their families’.

Needless to say these scenarios are hypothetical by design. In turn, some may dismiss them as an unfair demonization of the audience that are supposedly engaging with refugee in this fashion. Others may take this author to task for trivializing important dimensions of refugee settlement programmes and legitimate asylum procedures. On both counts perhaps an apology should be issued. Even so, the bigger question that should not fall through the crack is how it has become possible for refugees and asylums seekers to be framed as anything other than people who are existentially threatened?

The securitization of IDPs: A missing category of concern?

So far the ‘migration’ and ‘refugee’ crises imploding across the world have been discussed.. However, the purpose of this section is to illustrate that “for all those that flee, others stay behind, some choosing to take up weapons, others believing they can ‘ride out the storm’”.⁹¹

While IDPs are not gaining much coverage within securitized games surrounding the ‘migrant’ and ‘refugee’ crises, they are threatened. Concerns about food, shelter, health, belonging and living are ritualistically interwoven into their everyday existence. Compounding these concerns is the fact that the internally displaced remain in a hostile domestic environment where they can become more vulnerable to forcible resettlement, sexual assault and food deprivation.⁹² As Monika Barthwal-Datta indicates, “without financial means to leave the country IDPs are dependent on the local or national authorities for assistance, even for basic

⁹¹ Will H. Moore and Stephen M. Shellman, “Refugee or Internally Displaced Persons? To Where Should We Flee?”, *Comparative Political Studies*, Vol. 39, No. 5, 2006, p. 599; Jon Bennett, “Forced Migration Within National Borders: The IDP Agenda”, *Forced Migration Review*, Vol. 1, April, 1998.

⁹² Francis M. Deng, “Frontiers of Sovereignty: A Framework of Protection, Assistance and Development for the Internally Displaced”, *Leiden Journal of International Law*, Vol. 8, No. 2, 1995.

survival”.⁹³ It is also well established that IDPs camps are a ground for militarization.⁹⁴ This process can occur through the active recruitment of rebel groups and child soldiers⁹⁵ through encampments policies. Within IDP camps militarization can also happen through the siphoning of humanitarian funding and other resources for small arms sales. As a result, “the distinction between civilian and military space is not clear”.⁹⁶ Although militarization does not automatically equate with securitization, Young Hoon Song suggests that they are inherently interconnected for IDPs living in Kenya and Sudan. Another indicator of the securitization dynamics at work when it comes to the protection of all IDPs is the existential threats faced by humanitarian actors attempting to reach and help them.⁹⁷ In many circumstances, they are not simply targets of attack. They are also kidnapped, held hostage and killed.

Against these backdrops, it is surprising that the flight of IDPs and the types of violence surrounding their protection has attracted so little attention in security and securitization studies. This missing category of concern is even more surprising when we return to numbers. Figuratively speaking, several studies have reported that the number of IDPs forcibly displaced across the globe far exceeds the number of refugees and asylum-seekers.⁹⁸ According to a 2017 report compiled by the Internal Displacement Monitoring Centre, “there are currently twice as many IDPs as refugees in the world”.⁹⁹ In an earlier report, the United Nations Refugee Agency (UNHCR) estimated that in 2015 there were, “21.3 million refugees, 40.8 million internally displaced people and 3.2 million asylum seekers” in the world.¹⁰⁰ If these numbers are true, why are we not talking about an ‘IDPs crisis’ as a bigger security issue? Perhaps it is because IDPs have

not crossed an internationally recognized State border. By not crossing an international recognized State border, IDPs fail to qualify for the same legal protections as refugees. In effect, this means that the linguistic distinction drawn between IDPs and refugees is premised predominantly on the fact that this kind of movement occurs within national borders.¹⁰¹ By extension, certain types of internal displacement will not concern the international community or infer any obligations onto its shoulders since IDPs, “really only need access to meaningful enforcement of generic internationally recognized human rights”.¹⁰² Another reason that IDPs may be missing from the dominant security narratives is because there is no consensus on what this category means, who should be included and when internal displacement ends.¹⁰³ Depending on which definition is put into use, people who are internally displaced share certain family resemblances with migrants and refugees. Indeed, they can be labelled as ‘internal refugees’ or ‘economic migrants’.¹⁰⁴ Yet, many oppose stretching the definition of IDPs in these directions as it jettisons any specific focus given to this category of people.. Beyond the language games of migrant and refugees, however, a more complex fractioning of IDP category is already occurring around the world. Documenting the mass flight of people from Iraq after 2003, for example, Géraldine Chatelard noted that, “vulnerabilities span different categories of people: registered and non-registered IDPs or returnees, but also displaced and non-displaced persons”.¹⁰⁵ To capture and adapt to these complexities it is necessary not to fall into the trap of simply, “relabelling populations with new words”.¹⁰⁶ On the contrary, Peter Van der Auweraert has already identified that, “the ‘slicing up’ of the displaced and returning families into different categories” can produce rather than reduce the kind of obstacles facing IDPs.¹⁰⁷

Cathrine Brun has also documented the “unintended consequences following” [...] “the establishment of the IDP category”.¹⁰⁸

To say the least, then, the plight of the internally displaced deserves far more attention and linguistic nuance than it is currently afforded when we talk about people on the move in search of security. While welcoming this point, it must hold even if IDPs never cross international borders or into mainstream securitization studies.. Finding connections between IDPs and security will not be difficult. As Marguerite Contat Hickel explains, “no action to provide effective and lasting protection can be contemplated unless there is a satisfactory security environment”.¹⁰⁹ The key challenge will be create (de)securitized games in which IDPs are not simply spoken about but also spoken to through gestures of kindness and love.¹¹⁰

Acceptance and evolving language games: The way forward?

This article has concentrated on complex topics that surely warrant further discussion. Overall, it has questioned the soundness of numbers as beneficial blueprint for protecting migrants, refugees or IDPs. It also cautioned against the proliferation of security narratives that resuscitate and naturalize storylines of ‘inherent’ catastrophes and crises. It is important to bear in mind that security is unbound in the sense that it has no fixed meaning.. However, this outlook does not legitimate the escalation of unbound securitized games. A general finding of this article is that once securitization occurs, it can be extremely difficult to unmake. By extension, desecuritization is not an automatic guarantee even if the general consensus is that, “it *ought* to be sought”.¹¹¹

That said, this article is careful not to undermine the integrity and relevance of ongoing efforts to protect migrants, refugees or IDPs. It also does not want to nullify the prospects of change as we go forward. At this point, one may certainly ask what remains to be done. While ‘second generation’ scholars have already begun to explore the role of emotions and feelings in securitization processes, more energy must be put into understanding if, when and how these individuals feel threatened or protected or a mixture of both.. Acceptance will be vital tool to

taking steps in this direction. . To date the concept of acceptance put into use in securitization studies rotates around the ability of certain audiences to support the (de)securitizing moves enacted by securitizing actors and speakers. Extending an unconditional invitation to migrants and refugees whenever and wherever they arrive on our shores is a very different logic of acceptance. Acknowledging that too many people are still missing in our efforts to solve to ongoing ‘migrant’ and ‘refugee’ crisis will also require a broader conceptualization of acceptance. Including IDPs into our analysis is simply the tip of the iceberg. In the end perhaps what it all comes down to is a hope that we can accept that we are all equals. Dr Martin Luther King Jr. expressed this idea far more eloquently in his Nobel Peace Prize when he said

“Sooner or later all the people of the world will have to discover a way to live together in peace [...] If this is to be achieved, man must evolve for all human conflict a method which rejects revenge, aggression and retaliation. The foundation of such a method is love”.¹¹²

Only time will tell if this kind of love is attainable in the name of (de)securitization. For some scholars, activists and policy makers the conceptual foundation that Dr Martin Luther King Jr. called for will be labelled as utopian and naïve. For others, carving out broader understandings of acceptance and love will be out of sync with the ‘us’ versus ‘them’ identities that securitization process construct and the extraordinary measures that are legitimated in the process. Presumably, others will contend that moves in these directions will generate conceptual confusion rather than any analytical rigor. Each reader must make their own decisions about which arguments hold weight for them. However, the brief assessment of the (de)securitized games at play when it comes to the protection of migrants, refugees and IDP presented above illustrate that we must wrestle with broader themes of acceptance and love if we are to genuinely try and create alternative narratives to talk to migrants, refugees and IDPs long before we read about them in another journal article such as this one. This article also concludes that returning to these conversations with a richer conceptualization of acceptance

and love in tow may help us to transcend the terms of reference away from extraordinary measures and towards long-term solutions.¹¹⁴
