INTRODUCTION

This is a catalogue of the letterpress works of which Dalrymple claimed or admitted authorship, which have been accurately attributed to him, or which have been identified as having been written or published by him for others. The catalogue includes works listed by Dalrymple in *Nautical Memoirs and Journals* 1789 and the addenda lists issued annually to 1794, in *Catalogue of Printed Books and Tracts* 1792 and its subsequent revision in 'Memoirs of Alexander Dalrymple, Esq.' (*The European Magazine and London Review* 42 (1802), pp. 422-424), and in *Collection of Nautical Memoirs and Journals* 1806. To these are added pieces printed for Dalrymple at the Admiralty, and other works not occurring in Dalrymple's published lists of his publications.

The form of each entry is as follows:

The sequential catalogue number prefixed by 'A' (to denote a letterpress work), the title of the work in a shortened form consonant with clarity and identification, and the date of publication (known or [supplied]);

The bibliographical description of the work;

The description of the work from Dalrymple's lists of his publications;

Notes explanatory of the description of the work, its attribution to Dalrymple, or its connection with other works by Dalrymple.

The form of the bibliographical descriptions follows the pattern laid out in Philip Gaskell, *A New Introduction to Bibliography* (Oxford, 1972), pp. 321-335, which follows Fredson Bowers, *Principles of Bibliographical Description* (Princeton, 1949). For each work the following are given:

Transcription of the title-page, drop-title, or first words of text;

Collation formula, with register of signing;

Pagination statement;

Form of page numbering;

Press figures;

Type ornaments;

Details of contents (describing each page or group of pages);

List of plates normally occurring in the work as issued.

In cases where there is nothing to record (e.g. page numbering in unpaginated works) the category is omitted in the description.

In the transcriptions of title-pages and titles, the following conventions are used. The text of the title-page or title is given in bold face, with vertical bars to mark new lines. Supplied terms descriptive of layout, rules and ornaments are given in [square brackets] not in bold face. Capital letters are reproduced by CAPITAL LETTERS. Italic type is reproduced by wordprocessor-generated sloped *italic* letters. Small capitals are indicated by horizontal lines (sometimes discontinuous) above the letters, thus: **LITERAL TRANSLATION.** Gothic-style black letter or Old English type is rendered by underlining, thus: *East-India Company.* 'Script' type is rendered by underlined italic letters, thus: *Richard Pinnell.* The eighteenth-century long 's' is rendered by 'f', and wordprocessor-generated forms of the ligatures 'ç', 'ff', 'fl', 'fl', 'fl', 'th', 'th', 'th', 'th', 'th', and 'th' are employed. The two forms of the 'AD' logograph which Dalrymple commissioned in the early 1780s
are rendered by the wordprocessor-generated forms 'AD' and 'AD'. The standard non-lining numerals are rendered by lining numerals in transcription. These typographical conventions are used in this catalogue only in the transcriptions of title-pages and titles, and in the transcriptions of half-titles within quotation marks in parentheses in the descriptions of contents.

Successive states, issues or printings of a work are dealt with sequentially under the same catalogue number. New editions of a work are given separate catalogue numbers at the dates of the new editions: this departure from convention is explained by the greater significance here attaching to the contemporaneity of re-publication of groups of works than to the sequence of editions of any one work. An exception is made for works re-published from facsimile re-settings of type: in the absence of printed statements establishing the fact or date of re-publication such re-settings are dealt with sequentially under the same catalogue numbers as the first settings.

For the purpose of this catalogue a new state is defined as arising from an alteration or correction to standing type of a work not, of itself, warranting a distinction in issue between examples of the old and new states. A new issue is defined here as arising from an alteration to standing type or new typesetting resulting in the cancellation of leaves or sheets, and warranting the withdrawal of the old version or the parallel dissemination of two versions. Cancel title-pages or title-page sheets for different booksellers offer the commonest evidence for the latter practice. A new printing is defined here as arising from the cancellation of each sheet of a work and its consequent reprinting from corrected standing type, particularly where this occurred before formal publication. A new edition is defined here as a complete re-setting of type for re-publication, either with new intellectual input or, at least, a title-page statement indicative of a new edition.

In cases where impressions of plates were normally included in the work as issued, these are listed in the bibliographical description. In many of Dalrymple's works the letterpress served as an announcement of the separate availability of charts, plans and views of land at individual or set prices: in these cases the plates are not listed in the bibliographical description of the works announcing them.

A location list follows the catalogue, to indicate the sources of the examples of the works used in the compilation of the catalogue.

Dalrymple assembled *An Account of the Discoveries* in 1767 by summarising parts of the collection of narratives and reports of Pacific voyages which he had begun in 1766 to prepare for publication, and which he eventually published in 1769 and 1771 as *An Historical Collection of the Several Voyages and Discoveries in the South Pacific Ocean* (Catalogue A11-A12). His purpose appears to have been to influence the Royal Society committee for making appointments to the Transit of Venus expedition to the southern Pacific Ocean.

According to Dalrymple's preface to *An Historical Collection ... Volume I 1769/1770* (p. vii), he circulated a few copies of *An Account of the Discoveries* in 1767, withholding it from formal publication until 1769. In the preface to *An Account of the Discoveries* as published (and described here), Dalrymple refers (p. xii) to the disappointment of his hopes to lead such an expedition, and (p. xviii) to the section 'Data on which the chart of the South Sea was formed' in *An Historical Collection ... Volume I 1769*, which he implied was ready for publication. The text of parts of this preface clearly date to 1769 and not 1767. It is possible, therefore, that the version of *An Account of the Discoveries* circulating in 1767 differed in the text of the preface. The unusual repetition of the 'a' signature in the register of *An Account* as published suggests that such an earlier preface may have been shorter, not requiring the additional 'a' sheet in printing.

The preface has an autobiographical sketch, recording Dalrymple's belief that New Zealand represented the western limit of a southern continent, the eastern coast of which was supposed to lie near Easter Island. The announced second part of this work, 'an historical collection of the several voyages across the South Pacifick Ocean in a chronological series', was not issued in octavo, but was overtaken by the re-issue of the whole work in quarto as *An Historical Collection ... 1769/1770-1771*.

Dalrymple announced in 1770 or 1771 (in the advertisement following the half-title of the first fascicle of the second volume of *An Historical Collection ...*) that the two new quarto volumes would supersede *An Account of the Discoveries*, and invited purchasers to surrender copies in part exchange. The historical material in the first section of *An Account of the Discoveries 1767* was absorbed into the latter work, and the second and third sections were reprinted in the second volume. All seven plates were re-issued in *An Historical Collection ... 1769/1770-1771*.

The 'Chart of the South Pacifick Ocean' is explained in 'Data on which the chart of the South Sea was formed' in *An Historical Collection ... Volume I 1769/1770*. The plates republished from Valentyn's *Oud en Nieuw Oost-Indiën* are explained by Dalrymple in a note on p. 68: 'The cuts Valentyn has published of Tasman's voyage compensate, in some measure, for the very brief relation of the journal, which does not even mention the complexion of the natives of Amsterdam and Rotterdam, and has omitted to describe the embarkations, &c. of the Indians.'

Contents: 1-15 The Memorial of Alexander Dalrymple; 16 blank

Dalrymple drew up the Memorial in December 1768 in consequence of his disagreements with the Court of Directors in 1768 over the prosecution of the expedition to Balambangan which he had advocated since 1765, and particularly over his intention to publish Plan for the Extension of the Commerce of this Kingdom (Catalogue A5) in defiance of the Directors' wishes. In content, the Memorial is based on Dalrymple's memorial of 26 August 1768, in which he asked to be restored to his position at Madras if a decision was taken not to proceed with the Balambangan expedition. It was extended to take account of the subsequent threat of dismissal for breach of covenant.

The Memorial gives biographical details of Dalrymple from 1752 to 1759, extracts (p. 3) from commendatory letters of 17 April 1762 and 9 March 1763 and (p. 4) from documents of 7 June 1762, and also narrates events from 8 May to 1 December in the year of publication [1768].

The group of 73 type ornaments decorating the drop-title is the same as that used on page 5 of the first edition and page 1 of the second edition of An Account of What has Passed 1768/1769 (Catalogue A3).

CPBT 1792: 1768. 8°: 85 pages. Account of what has passed between the East India Directors and GD as first printed. Not sold.

The first edition of An Account of What Has Passed appeared on or shortly after 20 October 1768, in consequence of the order of 5 October to Dalrymple to surrender papers he had retained concerning Balambangan, and in defiance of the Company instruction to him not to publish on the Balambangan question. Charles Sayer, the Company's legal adviser, had read and reported on An Account of What Has Passed by 28 October 1768 (London, India Office Records: L/L/7/123).

Dalrymple here printed papers dated variously between 29 July and 12 October 1768, including the text of his memorial of 26 August to the Company. Only a few copies of this first edition appear to have circulated before Dalrymple superseded it with an updated second edition in December 1768 (Catalogue A4).

The group of 73 type-ornaments on page 5 was also used on page 1 of the second edition, and on page 1 of The Memorial of Alexander Dalrymple 1768 (Catalogue A2).

**CPBT 1792: 1768.** 8°: Title, &c. 4, 109 pages, Advertisement. Account of what has passed between the East India Directors and CD as published. NB. It is dated 1769, by a ridiculous custom of Printers, to date Publications, printed towards the close of the year, as if in the year ensuing.

Dalrymple published *An Account of What Has Passed* in an expanded second edition after the General Court of 21 December 1768 and before 4 January 1769, to advertise his intention to publish *Plan for Extending the Commerce of this Kingdom.*

The only deliberate change, apart from the imprint date, made in the second edition between the preliminary 1768 issue and the substantive 1769 issue was the inclusion of the list of errata. Dalrymple complained of the change in imprint date, but used examples of both issues in the sets of *An Account of What Has Passed* and *Plan for Extending the Commerce of this Kingdom* which he had bound in full red leather in 1769 for presentation.

The group of 73 type-ornaments on page 1 was re-used from page 5 of *An Account of What Has Passed* 1768, first edition (Catalogue A3), and was also used on page 1 of *The Memorial of Alexander Dalrymple* 1768 (Catalogue A2).

CPBT 1792: 1769. 8°: Title and Preface 4, 111 pages. Plan for extending the Commerce of this Kingdom and of the East India Company by an Establishment at Balambangan. NB. Although printed in 1769, it was not published till 1771.

Dalrymple's Plan, besides developing his argument for a settlement at Balambangan to exploit the India-China trade, included topographical descriptions of the northern part of Borneo. The map is explained as: 'The map, accompanying this essay, is merely to elucidate these points, and is not meant as a nautical performance; it contains only the large islands, except where some particular circumstance required the insertion of a small one.'

The advertisement in the first issue outlined Dalrymple's first scheme for a series of maps to cover the northern Borneo trading area. The first version of the Plan was not formally published, the Company successfully discouraging Dalrymple from doing so in 1769. A few copies circulated privately, but the effect of the proposal for publishing maps by subscription was lost. Presentation copies of the first issue, from this circulation, are found bound in red leather with An Account of What Has Passed 1768, second edition 1768/1769 (Catalogue A4).

The second issue of the Plan, formally published in May 1771, contained a new advertisement for a smaller series of charts, many of which had by then been published. This advertisement indicated that publication of the Plan followed Dalrymple's dismissal from East India Company service as Chief of Balambangan in March 1771. Pages 1 to 16 of the text were also revised and reprinted, to take account of Dalrymple's changed situation after his dismissal.
MEMOIR OF A CHART OF THE SOUTHERN OCEAN 1769

MEMOIR | OF A | CHART | OF THE | SOUTHERN OCEAN.

4°: A4 [$2 signed]
4 leaves, pp. 1 2-8 [= 8]
Page numbering: 2 to 8 at outer end of running title line

Plate: One chart:
A CHART OF THE OCEAN between SOUTH AMERICA and AFRICA. With the Tracks of Dr. EDMUND HALLEY in 1700 and Monsr. LOZIERS BOUVET in 1738. [Catalogue B11 690400]

NMJ 1789 #1: Memoir of a Chart of the Southern Ocean, GD, 1769. Pages 1 to 8. 2s.6d. [priced with A119, A121 and A122]

The Memoir serves as an explanation of the sources and coverage of the chart. Dalrymple also used the Memoir as a prospectus for a collection of plans, views and accounts of voyages in the southern Atlantic Ocean. Among the accounts of voyages were those of Halley, Bouvet and La Roche, which he eventually issued in 1775 in A Collection of Voyages chiefly in the Southern Atlantick Ocean 1775 (Catalogue A44). The proposed plans of Ferdinand Noronha, Ascension, Trinidad and Tristan da Cunha appeared later in the East India Company plans series (Catalogue B219, B218, B266 and B216), with associated descriptions in Collection of Views and Land and Plans of Ports in the East-Indies 1781 (Catalogue A70).

The Memoir was also sold with A Collection of Charts and Memoirs (Catalogue A21) after 1772, though priced separately in advertisements in Memoir of a Chart of the Bay of Bengal 1772 (Catalogue A23) and A Letter from Mr. Dalrymple to Dr. Hawkesworth 1773 (Catalogue A27). The chart is consequently found as part of the folio atlas of charts issued with A Collection of Charts and Memoirs.
This was the first of four pamphlets (Catalogue A7-A10) which Dalrymple contributed to the General Court discussions of 1769 over the ill-fated commission of supervisors of the Company's affairs in India. At the time of publication, Dalrymple had been a proprietor for only eight days, having acquired East India stock for the first time on 12 June 1769. This first letter was overtaken before publication by Dalrymple's development of his theme in A Letter to the Court of Directors ... concerning the Supervisorship 1769 (Catalogue A8), of which the main text was dated 30 June 1769.
A LETTER TO THE COURT OF DIRECTORS — CONCERNING THE PROPOSED SUPERVISORSHIP 1769

A LETTER TO THE COURT OF DIRECTORS FOR AFFAIRS OF THE UNITED COMPANY OF MERCHANTS OF ENGLAND TRADING TO THE EAST INDIES CONCERNING THE PROPOSED SUPERVISORSHIP.

[Single rule 12.6 cm] LONDON: Printed for RICHARDSON and URQUHART, under the Royal Exchange. MDCCLXIX.

4°: a1 A-B4 [$2 signed]
Press figures: 2: 14; 7: 4

Contents: [1] title; [2] blank; 1-15 To the Court of Directors, &c., dated by Dalrymple 30 June 1769 (15); 16 printed note to each Director (with space for addressee's name) concerning publication of the Letter, dated by Dalrymple, Soho Square, 3 July 1769

This quarto pamphlet superseded the unpublished octavo pamphlet A Letter to the Proprietors of India Stock, concerning the Proposed Supervisorship of 20 June 1769 (Catalogue A7).

In the printed note to be addressed to each Director inviting objections before publication, Dalrymple indicated that he had first printed 25 copies for circulation to the Directors, in case any alterations or corrections would be urged before formal publication. At least eight examples of the Letter are known to survive, all with the text of the printed note present, none marked for particular addressees, and none with any observed changes to the text of the Letter proper.

Contents: [1] title; [2] blank; 1-15 To the Proprietors of India-Stock, dated by Dalrymple 10 July 1769 (15); 16 blank; 17-22 Postscript

[A set of proofs of pages 1 to 15 is known, with extensive alterations in Dalrymple's handwriting.]

CPBT 1792: 1769. 4°: Title, 22 pages. Second Letter concerning the proposed Supervisors. 10th July 1769.

Dalrymple's Second Letter was written specifically to influence the ballot of 12 July 1769 in the General Court, against the appointment of supervisors. For his other contributions to the discussions, see Catalogue A7-A8 and A10.
Dalrymple's fourth pamphlet on the question of the commission of supervisors, and on the suitability of Sir John Lindsey in particular, drew on his experience of government while in Madras in the 1750s. In defence of the Company's independence of action, Dalrymple opposed the concept of supervisors, the method of their appointment, and the particular appointees.

CPBT 1792: 1770. 4*: Vol. 1. Title, Dedication 2, Preface and Introduction 30, Advertisement 2, Data of Chart and Essay of Soomon Islands 21, Authors 3, Natural Curiosities at Sooloo and Formation of Islands 24, 204, Errata 3 pages. Historical Collection of South Sea Voyages. 1 plate, 3 maps.

The list of 'Voyages and the authors consulted' is arranged according to the sections into which the main work is divided: Ferdinand Magellan; Ferdinand Grijalva and Pedro de Alvarado; Spanish discoveries before 1595; Juan Fernandez; Islands of Fontacias; Alvaro de Mendana y Neyra; Theodore Gerrards; Pedro Fernandez de Quiros; James Le Maire and Willem Schouten; the Orange, of the Nassau fleet; Abel Janszoon Tasman; John Davis; and Jacob Roggeveen. Voyages from Magellan to Quiros are dealt with in An Historical Collection ... Volume I, those from Le Maire and Schouten to Roggeveen in An Historical Collection ... Volume II 1771. To the account of Quiros' voyage are added the texts of two of his Memorials, including the eighth.

The Advertisement (pp. 175-204) announces Dalrymple's acquisition of a copy of C.S. de Figueroa, Hechos de Don Garcia Hurtado de Mendoza cuarto Marques de Canete (Madrid, 1613), from which he prints extracts correcting and amplifying his accounts of the voyages of Mendana and Quiros.

The section 'Data on which the chart of the South Sea was formed' summarises data from the voyages of Mendana, Quiros, Le Maire and Schouten, Tasman, and Roggeveen, included on the 'Chart of the South Pacifick Ocean'.

The unusual projection of the world map is explained on pp. ix-x of the Preface. The zoological drawing of lobsters illustrates 'Account of some natural curiosities at Sooloo' (pp. 1-21). The 'Chart of the South Pacifick Ocean' is additionally explained on p. xiii of the Preface, and is normally found here in its second or third state. The 'Plan of part of Papua and New Britain ...' illustrates 'Of the Salomon Islands' (pp. 16-21) and is additionally explained on p. xlv of the Preface: it is normally found here in its first or second state.

The order of the letterpress sections, as described here, follows that indicated in the contents page in the fourth issue.
The second issue differs from the first only in the half-title and title pages. The third issue differs from the second in the setting of the half-title and title pages, in the advertisement newly printed on the reverse of the half-title, in the dedication, and in the setting of the first two pages of the Preface. In each case the rest of the preliminary pages, and the other sheets, were provided from the same stock as the first issue. The third issue, with 1770 title-page and dedication, was the standard version, to which the first and second issues were preliminary. The fourth issue, distinguished by the presence of the contents leaf, dates from 1771 or later, and was connected with the ongoing sale of the two volumes of An Historical Collection as one. Relatively few examples have the contents leaf present; this invites the inference that it may have been regarded as an ephemeral 'instructions to binder' leaf and discarded after binding.

The reason for the quick succession of issues in 1769 and 1770 is unclear, unless it was to change the imprint date on a static sheet stock to improve sales. The cancelling leaves in the second issue would have made it awkward to bind, and Dalrymple may have used a decision to reprint the whole first sheet (for the third issue) as an opportunity to modify the dedication. The curious form of dedication, in offering the book to an unknown successful Pacific explorer of the the future, was caustically critical of previous expeditions, including that of Bougainville. The second (1770) form of dedication neither diluted nor harshened the basic criticism, and added only that the recipient of the dedication was to be the person who should 'succeed in establishing an Intercourse with a southern Continent', a phrase not previously mentioned.

The half title of the third 1770 issue has the 'C' of 'COLLECTION' aligned vertically above the 'SE' of 'SEVERAL', where the second issue has the same 'C' aligned vertically above the 'EV' of 'SEVERAL'. The publishers' imprint on the title page of the third issue has the 'His' of 'His MAJESTY' in upper and lower case, where the second issue has the same word in large and small capitals. The third issue has 'ELMSLEY', where the second issue has 'ELMSLY'.

There are eleven minor points of difference between the first and third issues in the setting of pp. vii-viii of the Preface. The third 1770 issue has the press figure '8' in the lower margin of p. viii, where the first and second issues have no press figure.

what may be farther expected in the South Sea; [1]-[40] Index

The temporary advertisement in the first part issue (p. [3]) explained that, because of delay in printing the account of the voyage of Roggeveen, the accounts of Le Maire and Schouten and of Tasman were published separately first. The advertisement also invited purchasers of *An Account of the Discoveries in the South Pacifick Ocean 1767* to return their copies of that work in part exchange for *An Historical Collection ... 1770-71*. The temporary advertisement, with its conjugate part title-page, was intended to be discarded by subscribers on completion of the volume.

The second part issue included the volume half-title and title pages, and comprised chiefly material announced in the advertisement on p. [3] of the first part issue.

The complete volume consists of the first and second part issues, less the temporary title-page and conjugate advertisement of the first part issue. This constituted the form in which the volume was thereafter supplied from stock, but examples are found to retain the temporary pages when there is no other evidence of their issue in parts to subscribers.

The sections into which the main work was divided correspond to the list in 'Voyages and the authors consulted' in volume I (see notes to *An Historical Collection ... Volume I 1769/1770*).

The half title of volume II has the 'C' of 'COLLECTION' aligned vertically above the 'SE' of 'SEVERAL', like that of the third issue of volume I, but it has no advertisement on the verso of the leaf.

The advertisement on p. [8] reconciled the expected disparity in size between volume I and volume II with the previously predicted (volume I, pp. xii-xiii) similarity in size between the two volumes. The advertisement also gave notice of an intention to investigate more recent East India Company voyages via New Guinea in another publication.

The complete volume was later re-issued bound with volume I, with both volumes depending on a new contents list on a single leaf tipped into the preliminary pages of volume I. The order of the letterpress sections, as described here, follows that indicated in the printed contents list in volume I.

MEMOIR OF A CHART OF THE CHINA SEA 1771: First edition

MEMOIR OF A CHART OF THE CHINA SEA. BY ALEXANDER DALRYMPLE, ESQ. LONDON: Printed in the Year M DCC LXXI.

4°: A2 B4 C2 [S2 signed (-C2)]

Plate: One chart (see also General Introduction to the Charts and Memoirs 1772 (Catalogue A22)):

A CHART of the CHINA SEA. Inscribed to Monsr. D'APRÈS de MANNEVILLETTE the ingenious Author of the NEPTUNE ORIENTAL ...
[Catalogue B34 710419]

The Memoir gives an explanation and evaluation of the sources used for the chart (Catalogue B34 710419 China Sea), the stated purpose of which was to show the geographical situation of Balambangan.

The Memoir was first issued with the chart in 1771, and included in A Collection of Charts and Memoirs in 1772 (Catalogue A21). A revised second edition of the Memoir was published in 1786 (Catalogue A103), the chart having also undergone revisions.
ESSAY ON THE MOST COMMODIOUS METHODS OF MARINE SURVEYING
1771: First edition

ESSAY ON THE MOST COMMODIOUS METHODS OF MARINE SURVEYING. [full-measure rule] [group of 23 type ornaments] [full-measure total rule] LONDON: Printed in the Year M DCC LXXI.

4°: A²(-A²,=χ1) B-F² χ1 [$1 signed]
Page numbering: (2) to (21) centred above text
Type ornaments: [1]: see Title

Plates: Two plates of surveying diagrams giving a total of fifteen geometrical figures illustrating the text and linked to it by shoulder notes in the text:
[Seven diagrams of aspects of marine surveying, numbered 1 to 7.]
[Catalogue B22 710000g]  
[Eight diagrams of aspects of marine surveying, numbered 8 to 15.]
[Catalogue B23 710000h]

First issue, before revision of text pages 5 to 8.

Second issue, in 1771, with text pages 5 to 8 revised and reprinted:
4°: A²(-A²,=χ1) B² C²(1C²) D-F² χ1 [$1 signed]
Page numbering: (2) to (21) centred above text
Type ornaments: [1]: see Title

Plates: Two plates of surveying diagrams, as in first issue.

The Essay was an exhortation to ships' officers to take observations for surveys. After a discussion of the basic geometry of surveying, Dalrymple recommended using the quadrant instead of the compass for bearings. The Essay suggested different methods of baseline measurement, including measurement by sound and by observed latitudes.

The cancelling half-sheet C in the second issue revised the text to deal with the point imperfectly considered in the footnote on page 5 of the first issue, that though two objects A and B appear under the same angle from every part of the greater segment of a circle passing through those objects (figure 2), they also appear under another angle from every part of the lesser segment of the same circle, and that there is a direct relationship between the angle in the greater segment and
the angle in the lesser segment. The revising text was set significantly longer on the page throughout the cancelling half-sheet. To certain recipients of the first issue Dalrymple sent the replacement half-sheet loose, inviting them to make the substitution.

The Essay was first issued in 1771, and included in A Collection of Charts and Memoirs in 1772 (Catalogue A21). A revised second edition was published as Essay on Nautical Surveying in 1786 (Catalogue A107), and the text was largely incorporated in the unpublished treatise Practical Navigation [1790] (Catalogue A175), before re-use in the new edition of Essay on Nautical Surveying in 1806 (Catalogue A232).

4°: A² B-H⁴ I² [S² signed (-12)]
32 leaves, pp. [4] 1-60 [= 64]
Page numbering: [1] to [60] centred above text

Plates: One chart (see also General Introduction to the Charts and Memoirs 1772 (Catalogue A22)), and five plates, numbered 3.1 to 3.5 in General Introduction:

A CHART of part of the COAST of CHINA, and The adjacent ISLANDS from PEDRO BLANCO to the MIZEN. Laid down from Observations made in 1759 and 1760, in the Schooner CUDDALORE, and in the Ship LONDON, 1764. BY A DALRYMPLE. [Catalogue B33 710121]

3.1 [Construction diagram for 'Chart of Part of the Coast of China', with meridian of Grand Ladron.] [Catalogue B24 7100001]

3.2 Chart of Part of the COAST of CHINA by Felis Mendoça 1760 [Inset:] C. Alves's Sketch of his Passage 1765. [Catalogue B25 710000j]

3.3 Views of COAST of CHINA by JZ. Pl. 1. [Catalogue B26 710000k]

3.4 Views of land on the Coast of China. Plate 2. [Catalogue B27 7100001]

3.5 Views of land on the Coast of China. Plate 3. [Catalogue B28 710000m]

The Memoir lists the sources for the chart (Catalogue B33 710121 China). In the construction diagram for central part of the chart at the same scale, Dalrymple followed the practice he advocated in Essay on Marine Surveying 1771 (pp. 19-20), of preparing a second parallel chart showing only lines of bearing and points of observation. The contents of the Memoir are: list of stations and bearings (pages 1-23); journal of the London 15-23 November 1764 (pages 24-60).

The Memoir was first issued with the chart in 1771, and included in A Collection of Charts and Memoirs in 1772 (Catalogue A21). A second edition of the Memoir was published in 1786 (Catalogue A108), and the text was incorporated in Observations on the South Coast of China, and Island of Hainan 1771, fourth edition 1806 (Catalogue A237).

JOURNAL OF THE SCHOONER CUDDLALORE ON THE COAST OF HAINAN 1760. BY ALEXANDER DALRYMPLE, ESQ. LONDON: Printed in the Year M DCC LXXI.

Plates: Two plates, numbered 5.1 and 5.2 in General Introduction to the Charts and Memoirs 1772:

5.1 CHART of the S.E. Coast of HAINAN from a SWEDISH Chart made in 1742, by Capt'n. C. G. Ekeberg, with additions & alterations. Laid down from Observations in the Cuddalore in May 1760. [Catalogue B31 710000p]

5.2 Coast of Hainan. [Views of land: Catalogue B32 710000q]

Dalrymple's journal of the Cuddalore for 13-27 May 1760 occupies pages 1-34 of the text. The journal of the same ship for 28 August-1 September 1760 follows on pages 35-38.

The Journal was first issued in 1771, and included in A Collection of Charts and Memoirs in 1772 (Catalogue A21). A second edition of the Memoir was published in 1786 (Catalogue A110), and the text was incorporated in Observations on the South Coast of China, and Island of Hainan 1771, fourth edition 1806 (Catalogue A237).

The Preface, printed as F4 and intended to be re-arranged by the binder of each copy, is frequently found bound, as printed, after page 38.

MEMOIR OF THE CHART OF THE WEST COAST OF PALAWAN, OR PARAGUA, CONTAINING The Journal of the Schooner CUDDALORE, IN DECEMBER, 1761. BY ALEXANDER DALRYMPLE, ESQ. LONDON: Printed in the Year M DCC LXXI.

4°: A² B-D⁴ E² [S² signed (-E²)]

Page numbering: [1] to [16] centred above text

Plates: One chart (see General Introduction to the Charts and Memoirs 1772 (Catalogue A22)), and one other plate, numbered 6.1 in General Introduction:

6.1 [Schooner Cuddalore VIEWS on the COAST of PALAWAN by G.D. in December 1761] [Catalogue B35 710512]

The Memoir explains the chart (Catalogue B14 691026 Cuddalore/Palawan) by printing Dalrymple's journal of the Cuddalore for 1-14 December 1761.

The Memoir was first issued in 1771, and included in A Collection of Charts and Memoirs in 1772 (Catalogue A21). A second edition of the Memoir was published in 1786 (Catalogue A111).
THE COUNTRY CALLED, IN THE MAPS, NEW ZELAND ... 1771

The Country called, in the Maps, New Zeland, has been discovered by the Endeavour to be two islands, together as large as Great-Britain; [...]

The scheme developed, after the return of the Banks expedition in the Endeavour in July 1771, in a discussion which included Benjamin Franklin and Dalrymple. Dalrymple recorded that he 'was induced to offer to undertake the command on such an Expedition', and requested to outline the scheme on paper. Franklin's comments on Dalrymple's scheme are printed on pages 4 and 5.

The pamphlet has been frequently reprinted by others. The 1882 reprint, from a facsimile setting of type, has a made-up title on page 1 not present in copies from the original 1771 issue: SCHEME of a Voyage to Convey the Conveniencies of Life, Domestic Animals, Corn, Iron, &c, to New Zeland, with Dr. BENJAMIN FRANKLIN'S Sentiments upon the Subject. By ALEXANDER DALRYMPLE. London, Aug 29th, 1771. [Reprinted 1882.]

For the list of the contents of A Collection of Charts and Memoirs, see General Introduction to the Charts and Memoirs 1772. This half-sheet serves as the preliminary pages to the General Introduction and thence to the six charts and six memoirs described there. It was not reissued for the second editions of the General Introduction and memoirs in 1786.

The note giving Palmer as writing engraver applies to chart 5 ('The West Coast of Palawan'), and to plates 3.2, 3.3, and 3.5 (in Memoir of a Chart of Part of the Coast of China 1771), and 5.1 and 5.2 (in Journal of the Schooner Cuddalore on the Coast of Hainan 1771). The additions and corrections apply to Essay on the Most Commodious Methods of Marine Surveying 1771 [issue I only] and to Memoir of a Chart of the China Sea 1771. The errata apply to Memoir of a Chart of the China Sea 1771, Journal of the Schooner Cuddalore on the Coast of China 1771, Journal of the Schooner Cuddalore on the Coast of Hainan 1771 and General Introduction to the Charts and Memoirs 1772.

These pages, together with the unnumbered preliminary leaves in Collection of Charts and Memoirs 1772, form the introduction to the six charts and six memoirs listed on pages iii-v. The charts are listed above, under 'Plates'. The memoirs are: Essay on the Most Commodious Methods of Marine Surveying 1771 (Catalogue A14); Memoir of a Chart of the China Sea 1771 (Catalogue A13); Memoir of the Chart of Part of the Coast of China 1771 (with five additional plates: Catalogue A15); Journal of the Schooner Cuddalore ... on the Coast of China 1771 (with two additional plates: Catalogue A16); Journal of the Schooner Cuddalore on the Coast of Hainan 1771 (with two additional plates: Catalogue A17).
Besides listing the contents of *Collection of Charts and Memoirs*, the *General Introduction* includes: general notes on the charts (pages v-vi); particular notes on charts 3 and 4, not accompanied by memoirs (pages vi-viii); lists of memoirs and charts projected by Dalrymple (pages viii-x); a list of Dalrymple’s collection of charts of the East Indies, in 21 sections (pages xi-xxxvii); and a list of the contents of Dalrymple’s copy of J. van Keulen, *De Nieuwe Groote Lichtende Zee-Fakkel, Het Sesde Deel* (Amsterdam 1753) (pages xxxviii-xl).

Early presentation copies of the complete *Collection* are found with the charts printed on India paper and folded in. More normally, the charts were sewn separately, flat, into an oblong folio binding, to accompany the quarto letterpress. In this form the letterpress and chart bindings are frequently found augmented with *Memoir of a Chart of the Southern Ocean 1769* (Catalogue A6) and *Memoir of a Chart of the Bay of Bengal 1772* and their respective charts.

A second edition of the *General Introduction* was published in 1786 (Catalogue A106) without the preliminary *A Collection of Charts and Memoirs* leaf, but with second editions of the constituent memoirs.
MEMOIR OF A CHART OF THE BAY OF BENGAL 1772: First edition

MEMOIR OF A CHART OF THE BAY OF BENGAL. PUBLISHED AT THE EXPENCE OF THE UNITED EAST-INDIA COMPANY. PRINTED IN THE YEAR MDCCCLXXII.

4*: A² B⁴ [$² signed]

Plates: One chart:
A Chart of the Northern Part of The BAY of BENGAL. Laid down chiefly from the SURVEYS made by Bartholomew Plaisted AND John Ritchie. [Catalogue B37 720915]

The Memoir relates the circumstances of the construction of the chart, at the East India Company's request, and explains and evaluates the sources, private and official, which Dalrymple used in its compilation.

The Memoir was also sold with A Collection of Charts and Memoirs (Catalogue A21) after 1772, though priced separately in the advertisement in A Letter from Mr. Dalrymple to Dr. Hawkesworth 1773 (Catalogue A27). The chart is consequently found as part of the folio atlas of charts issued with A Collection of Charts and Memoirs.

A second edition of the Memoir was published in 1787 (Catalogue A129).
A GENERAL VIEW OF THE EAST-INDIA COMPANY 1772

Dalrymple's publication, in December 1772, of a general survey of the administration of the East India Company's financial affairs, which he stated to have written in January 1769, was his second anonymous contribution to the financial debate. In its argument Dalrymple was instinctively opposed to the diminution of Company authority by the officers of the Crown. The dating of the elements of the work is complex: the preliminary pages, and pages 94 to 108, date from November and December 1772, while pages 1 to 93 are the January 1769 text. No 1769 publication is known.

The section dated 25 February 1769 concerning the Company's charter rights to acquire territorial revenues in India (pages 83 to 93) were revised and re-published by Dalrymple at Company expense in May 1773 as The Rights of the East India Company (Catalogue A26).

Dalrymple anonymously asserted authorship of A General View in an advertisement in Considerations on the East-India Bill 1779 (Catalogue A61).

Identified from William Marsden's copy in the Royal Geographical Society Library, which has the pencilled title 'A Paper concerning the General Government of India' (corresponding to the entry in Catalogue of Printed Books and Tracts 1792) between the second three-part rule and the text on page 1.

I am always inclined to respect the institutions commences with an extract from Johnstone's Thoughts on our Acquisitions in the East Indies, a pamphlet Dalrymple criticised more fully in Considerations on a Pamphlet 1772 (Catalogue A20). Dalrymple argued here against the appointment of a governor-general in Bengal, preferring (with Pigot) government by council in each presidency.
THE RIGHTS OF THE EAST-INDIA COMPANY 1773

First issue, identified by a nine-line paragraph beginning 'The Act of Parliament [...] on page 2, the incorrect date '1736' in line 5 of page 11, a nine-line paragraph beginning 'But Corporation of said Company [...] in the lower part of page 11, and a nine-line paragraph beginning 'In 1755, the Company's Dividend, [...] on page 16.

Second issue, after considerable corrections, identified by a five-line paragraph beginning 'The Act of Parliament [...] on page 2, the corrected date '1766' in line 5 of page 11, a ten-line paragraph beginning 'But Corporation of said Company [...] in the lower part of page 11, and a sixteen-line paragraph beginning 'In 1755, the Company's Dividend, [...] on page 16:

Dalrymple's statement of the East India Company's charter rights to acquire and possess territorial revenues in India first appeared under the date 25 February 1769 in A General View of the East-India Company 1772 (Catalogue A24), pages 83-94. To this he added a commentary on the Company's financial policy for publication at the Company's expense as The Rights of the East-India Company in May 1773.

The second issue corrected some typographical infelicities, which necessitated consequential changes to the length of pages 3-6, page 11 and pages 16-19 to accommodate the alterations. Other small corrections were made between first and second printings to the text on page 12 (line 13, comma added after 'priviledges'; line 14, comma added after 'acknowledged'; line 15, 'of the' deleted in 'any of the Priviledges'; line 18, 'the Publick' corrected to 'that Publick'), page 17 (second table,
'£8,634,574' set in small type instead of body text type), and page 18
(line 3, '£' added before '369,398'; line 5, '£' added before '2,169,398';
line 5, stop after '£2,169,398' altered to comma and 't' of following
'though' altered to lower case; line 10, 'even' added after 'any Share,').
A LETTER FROM MR. DALRYMPLE TO DR. HAWKESWORTH 1773

Dalrymple wrote A Letter in response to criticisms he perceived in John Hawkesworth, An Account of the Voyages undertaken ... for making discoveries in the Southern Hemisphere, 3 volumes (London, 1773). He rebutted Hawkesworth's dismissal of his theory of a southern continent, adducing historical evidence particularly from the copy of the 'Arias Memorial' of c.1615 which he had acquired (see Catalogue A30). The second part of A Letter criticises Hawkesworth's practices in editing the journal of the Endeavour.

In the advertisement on page [2] Dalrymple offered to purchasers of An Historical Collection of the several Voyages and Discoveries in the South Pacific Ocean 1769/1770-1771 free copies of A Letter, of the planned revision of the chart of the southern Pacific Ocean, and of 'Arias's Memorial' (Catalogue A30: Señor. El Doctor Iuan Luis Arias, dize ... 1773). The revised chart of the southern Pacific Ocean proposed on page 31 of A Letter, according to a letter of 20 May 1774 from Dalrymple to D'Après de Mannevillette (Paris, Archives Nationales: Marine 3JJ 341(13)), was to be a new chart at a larger scale than the small-scale sketch published with An Account of the Discoveries 1767 and An Historical Collection 1769/1770-1771. There is no evidence that Dalrymple proceeded further with this project. Some copies of A Letter
include examples of the 1767 South Pacific Ocean chart (Catalogue B7 671000), usually in the third state with the Borneo outline added. This has led to the false inference that Dalrymple, in his advertisement of 3 July 1773, intended to issue only impressions from a corrected state of the 1767 plate.

Hawkesworth responded to Dalrymple's letter by issuing a second edition of An Account of the Voyages (which largely used unsold stocks of the first edition) with a new 'Preface to the Second Edition' in which he attempted to reply humorously to Dalrymple's criticisms. Dalrymple prepared his second reply shortly before Hawkesworth's death (Catalogue A29: Mr. Dalrymple's Observations on Dr. Hawkesworth's Preface to the Second Edition 1773).
Proposals for engraving by Subscription sundry Plans of Ports, &c. in the East-Indies.

4* : 4 leaves
4 leaves, pp. 1 2-7 8 [= 8]

Contents: 1-7 Proposals for engraving by Subscription sundry Plans of Ports, &c. in the East-Indies, with a list of conditions, dated by Dalrymple, Soho Square, 16 August 1773, and with form of subscription receipt and forms of account current; 8 blank

The Proposals offered to subscribers serial instalments of large-scale small-format plans of ports and anchorages: 'I have thought it would be an acceptable service to the Publick to engrave the plans, in my Collection, of Bays Harbours &c. in the East-Indies, as it is often of the utmost benefit, and always very satisfactory to Navigators to be possessed of particular plans of the Places whereto they may be carried by chance or accident, as well in as out of the common and accustomed tracks. ... I propose that the Plans shall be accompanied with Views of Land, and nautical instructions concerning the Places to which those Plans and Views relate, together with such other explanations as are in my possession. ... The Work here proposed is intended to be a mere Pilot-Book, consisting entirely of particular plans, without any General or Coasting Charts; and to be nothing more than an exact publication of such places as are thought worth engraving, and of such explanations concerning them as are in my possession.' (pages 1-3).

The text of the Proposals was completely revised and re-set as a 4-page pamphlet on 14 December 1773 for a second 'edition'. Examples of this version are found only in the published first instalment Plans of Ports in the East Indies 1 1774 (Catalogue A35) and in the completed A Collection of Plans of Ports in the East Indies 1775 (Catalogue A44). The Proposals as originally printed include on pages 5 to 7 the form of subscription receipt to be completed on payment, a form of register for recording the delivery of parts to the subscriber, and forms for subscribers to record cash received and cash disbursed in the account current of the fund. These were not present in the 14 December 1773 version.

In Proposals Dalrymple included a reference to 'the List of my Collection of Charts of the East-Indies, and the List of Charts in Van Keulen inserted in the General Introduction to the Memoirs and Charts I have published of my own voyages' (page 2; see General Introduction to the Charts and Memoirs 1772, pages 13 and 38).

The 14 August 1773 edition of Proposals is known only in a copy with margins trimmed close to the type area for sending by post to D'Après de Mannevillette, and preserved among the latter's papers.
MR. DALRYMPLE'S OBSERVATIONS ON DR. HAWKESWORTH'S PREFACE TO THE SECOND EDITION 1773

[Three-part rule 12.7 cm] Mr. DALRYMPLE's Observations on Dr. HAWKESWORTH's Preface to the Second Edition.

Page numbering: [ 1 ] to [ 19 ] centred above text

Contents: 1-18 Mr. Dalrymple's Observations on Dr. Hawkesworth's Preface [...] , dated by Dalrymple, Patshull, Staffordshire, 18 September 1773 (18); 19 Postscript; 20 blank

First printing, before corrections and before addition of notice on page 20 recording Hawkesworth's death.

Second printing, with revisions to the text made in the forme on all sheets for the second issue, and a notice recording Dr Hawkesworth's death added on page 20 previously blank:

4°: B4(tB4) C4(tC4) D2(tD2) [S2 signed (-D2)]
10 leaves, pp. 1-20 [= 20]

Page numbering: [ 1 ] to [ 19 ] and ( 20 ) centred above text

Contents: 1-18 Mr. Dalrymple's Observations on Dr. Hawkesworth's Preface [...] , dated by Dalrymple, Patshull, Staffordshire, 18 September 1773 (18); 19 Postscript; 20 notice (beginning 'N. B. Some Friends, [...]') explaining that Dr Hawkesworth's death prevented formal publication

Provoked by Hawkesworth's 'Preface to the second Edition' of his An Account of the Voyages undertaken ... for making Discoveries in the Southern Hemisphere, Dalrymple's further observations were less temperate and more personally critical of Hawkesworth. A focus of argument was the striking of the Endeavour on 10 June 1770, whether by accident or misconduct. The Postscript on page 19 prints an extract from the log of Endeavour for 10 June 1770.

The note on page 20 of the second printing ('N.B. Some Friends, to whom the proof sheets were shewn, [...]') suggests that the first printing, without that note, was a only a proof. Sufficient copies of that printing survive, some in 'presentation' collections, to cast doubt on that argument. Neither printing was formally published: there was a small private circulation of the first printing, presumably for the type
of comment that Sir David Dalrymple and other supplied, after which a large number of minor corrections were made for a formal publication. This formal publication was rendered inopportune by Hawkesworth’s death in November 1773, and examples from the second printing represent a second private circulation of the Observations by Dalrymple after Hawkesworth’s death.
SEÑOR. EL DOCTOR IUAN LUIS ARIAS, DIZE ... 1773

[Begins, after a cross:] | SEÑOR. | [three-line capital:] EL Doctor Juan Luis Arias, dize: Que por convenir tanto | [...]

4*: A-G² [$1 signed]

14 leaves, pp. 1 2-26 27-28

Contents: 1-26 text begins 'Señor. El Doctor Juan Luis Arias, dize ...'; 27 colophon ('FÜE IMPRESSO EN LA CIUDAD D'EDIMBOURGA, EN | ESCÓCIA, EN LA CASA DE MURRAY Y COCHRAN, EN | EL ÁNO MDCCCLXXIII.'); 28 blank

Dalrymple printed the Spanish text of the 'Arias Memorial' after using it as a source for An Historical Collection of the several Voyages and Discoveries in the South Pacific Ocean, Volume I 1769/1770, and in consequence of its having become a focus of his argument with Hawkesworth (Catalogue A27: A Letter from Mr. Dalrymple to Dr. Hawkesworth 1773).

Dalrymple reported having acquired his manuscript in 1765 from the bookseller Thomas Davies, in a group of documents from Colbert's library (An Account of the Discoveries 1767, p. xxvii; Catalogue of Authors who have written on Rio de la Plata 1807, p. 16). The memorial itself dated from c.1615, when it was drawn up in Spain for presentation to Philip IV as a summary of knowledge of discoveries in the Pacific Ocean.

Dalrymple sent other French- and Spanish-language printing jobs, under supervision of his brother James, to Murray and Cochran in Edinburgh in or around 1773 (see also Catalogue A31-A33 and A45).
This is a preliminary edition, in Spanish with footnotes by Dalrymple, of the copy Dalrymple made or received in 1761 of the manuscript, then in the possession of Don Manuel Galves, governor of Zamboanga on Mindanao, of Correa's 1740 description of the coast of Luzon (Plans of Ports, &c. in the East Indies 3 1774, p. 3; A Collection of Plans of Ports in the East Indies 1775, introduction, p. 17). Dalrymple gave a further copy of the manuscript to Sir Hyde Parker, whose translation he published posthumously as An Exact and True Description of the Coasts, Ports, Islands and Shoals ... of Luzon 1789 (Catalogue A165).

From typographical similarities with Dalrymple's edition of the 'Arias Memorial' (Catalogue A30), the printing of this edition of Correa is attributed to Murray and Cochran and dated tentatively to 1773. Dalrymple is not known to have proceeded further with publication of a Spanish-language edition.
DERROTA DEL PUERTO DE CAVITE AL EMBOCADERO DE SAN BERNARDINO ... [1773]

Contents: 1-42 Derrota del Puerto de Cavite al embocadero de San Bernardino ... , including (3-42) Breve regimiento y practica hidrografica desde el puerto de Cavite hasta el meridiano del Cabo del Espiritu Santo, oriental hasta el occidental, y termina de la cabeza del N de la isla de Borneo; en que son contenidas las demarcaciones y distancias ya dichas de unas islas con otras, baxos, placeres, ensenadas, puertos, ríos y fondos, fluxos y refluxos del mar, que regularmente corren entre dichas islas por sus bocanas; mayormente, en el embocadero de San Bernardino, practicados attentamente, por el Capitan Don Antonio Perez Gil, Professor de las sciencias Mathematicas, y experto piloto de la Carrera de Philipinas

This is an edition of one of a number of Gil's manuscript topographical accounts of the southern Philippines which Dalrymple received from Don Manoel Galves at Zamboanga in 1761 (see also Catalogue A33; A Collection of Plans of Ports in the East Indies 1775, introduction, p. 17).

From typographical similarities with Dalrymple's edition of the 'Arias Memorial' (Catalogue A30), the printing of this edition of Gil's Derrota is attributed to Murray and Cochran and dated tentatively to 1773. Dalrymple is not known to have proceeded further with publication of a Spanish-language edition.

Contents: 1-8 text begins 'MS. A. De Romblon a la punta de Bulacave ...', including (7-8) Viaje para Manila por entre la Isla de Bojol, y la Isla de Leyte

This is an edition of a topographical account of the southern Philippines thought to have been among a group of manuscripts by Don Antonio Perez Gil which Dalrymple received from Don Manoel Galves at Zamboanga in 1761 (see also Catalogue A32; A Collection of Plans of Ports in the East Indies 1775, introduction, p. 17).

From typographical similarities with Dalrymple’s edition of the 'Arias Memorial' (Catalogue A30), the printing of this manuscript is attributed to Murray and Cochran and dated tentatively to 1773. Dalrymple is not known to have proceeded further with publication of a Spanish-language edition.

The first number of the planned series of Plans of Ports incorporated, with its preliminary pages, a revised version of the Proposals of August 1773 (Catalogue A28). The six preliminary leaves were intended to be discarded as the collection progressed. The temporary collection title was to be replaced. The note soliciting further plans was to be discarded. The list of errata, the advertisement, and the list of contents were to be subsumed in a larger lists and in an introduction. The text of the preface was to be re-used. The tabular index was to be superseded by an extended index in Plans of Ports in the East Indies 2 1774. The 'Explanation of the Plans' was to increase as further numbers were issued. For the completed publication, see A Collection of Plans of Ports in the East Indies 1775 (Catalogue A44).

Only nineteen of the twenty listed plates were issued in this number, the plate for Johanna Bay being held over to 1775. Five plates were re-engraved and re-issued before March 1775 in Plans of Ports, &c. in the East Indies 6 1775 (Catalogue A43). The compass rose plate was issued loose with the number to permit users to mark radial lines on the plans.

The advertisement explains the experimental engraving techniques used, and indicates the purpose of the compass rose plate.

The 'Explanations to the Plans' range in form from editorial notes and compilations to extracts from ships' journals and other narrative accounts. The preface explains the tabular index and the 'commonplace-
book'system of marginal references which gives access to the explanations.

The six preliminary leaves of the second number of *Plans of Ports* were intended to be discarded as the collection progressed. Information from the introduction was to be incorporated in a general introduction to the collection. The list of errata was subsumed into a larger list. The tabular index was superseded by a similar index covering the whole volume.

Only twenty-three of the twenty-four listed plates were issued in this number. The plate for Khark was added as a substitute for the Keyser's Bay plate, which was held over to 1775.

The second number was intended to concentrate on plans of ports in Sumatra and the Mentawai Islands. The explanations consisted primarily of a long extract from Commodore John Watson's journal of the Revenge in 1762 (pages 36 to 78), and 'An Historical Relation of the several Expeditions from Fort Marlborough to the Islands adjacent to the West-Coast of Sumatra' (pages 89 to 112). 'An Historical Relation' described expeditions to the Mentawai Islands between 1749 and 1757. The report of the 1750 expedition was thought lost at the time Dalrymple made his
compilation: its subsequent discovery led to the provision of a 12-page addenda when the explanations were incorporated in the complete *A Collection of Plans of Ports in the East Indies 1775* (Catalogue A44).

The two preliminary leaves, giving the part title and introductory material, were intended to be discarded when this number was formed (with other numbers) into the complete A Collection of Plans of Ports in the East Indies 1775 (Catalogue A44).

As first printed this number lacked the last two introductory paragraphs on page 4. A correction slip with the two paragraphs (set wider) was added. Dalrymple's name and the date were reprinted on the slip, which obscured the original setting of those lines.

The third number was devoted to plans of the Philippines, and Dalrymple's additional note referred to his plan to compile a general chart of the Philippines. The four pages of explanation were for the plan of St. Jacinto.

CPBT 1792: 1774. 8°: 35 pages. A full and clear Proof that the Spaniards have no right to Balambangan.
The circumstances of the publication of *A Full and Clear Proof* were the East India Company deliberations over the unsatisfactory handling of the Balambangan expedition by Herbert. As a prelude to advancing again his willingness to be considered for the chiefship of Balambangan (see Catalogue A40), Dalrymple published his gloss of January 1770 on the legal opinion on the East India Company's case for continuing to maintain a settlement at Balambangan. The Company's legal advisers deemed it a political question, depending on an interpretation of the Treaty of Munster. Dalrymple had sought to provide that interpretation in January 1770, using evidence from Spanish documents.

Dalrymple's gloss precedes the 'Case for the East-India Company', in which the case begins on page 17, and the question and answer on page 34.

This second issue differs from the first only in the description of Nourse on the title page.

Contents: 1 To the Proprietors of East-India Stock, letter dated Soho-Square, 20 December 1774 by Dalrymple (1), as preface; 1-8 letter to the Court of Directors, dated Soho-Square, 9 December 1774 by Dalrymple (2), with accompanying Conditions Proposed (3-4), Statement of Account (5), Annual Account (6-7), and Observations on the Account (7-8)

In the general disquiet over Herbert's administration of the Balambangan settlement initiated by the Britannia expedition, Dalrymple offered his services again to the Court of Directors, more than three years after his 1771 dismissal from the expedition. When the Court did not accept, Dalrymple published his offer and 'Conditions Proposed' in a pamphlet directed to the General Court.

The entry in the Statement of Account (page 5) for 'Cash paid to Mr. Dalrymple' is usually found amended by hand to '1759 to 1765' and to '£802'. Dalrymple's venture account invited the incorporation of all income and outgoings on Balambangan since the first despatch of the Cuddalore in 1759: in proposing himself for the chiefship of the settlement he envisaged accounting for the previous expeditions.

Contents: 1-7 To the Proprietors of East-India Stock, letter dated Soho-Square, 27 March 1775, by Dalrymple (7); 8 blank

After Pigot's appointment on 3 March 1775 as Governor of Madras for a second term, Dalrymple applied to be reinstated to his own position at Madras, so as to accompany Pigot, in whose household he had been living. Dalrymple had already published a pamphlet urging the General Court to appoint Pigot (Catalogue A259: To the Proprietors of East-India Stock 1775): on learning from the Company's legal adviser that his own reinstatement was also to be a matter for a General Court to decide, by the provisions of the 1773 Regulating Act, he produced this pamphlet in support of his own case.

Plan of MERJEE on the MALABAR COAST. ... By Elias Bates Engineer 1725. [Catalogue B118 750115c]
Dalrymple stated in 1783 that Collection of Plans of Ports 1775 had been completed in six numbers: 'This Collection of Plans was begun to be published in Numbers by Subscription in 1774. ... the 6th Number was published in the beginning of 1775, immediately before my return to India, which was in April of that Year. These Six Numbers contained 78 Plans, from unpublished MSS, besides many Views, on 83 Plates: ...' (General Introduction to a Collection of Plans of Ports 1783, p. 3).

Evidence of surviving copies suggests that the fifth and sixth numbers comprised five groups of letterpress pages and two groups of engraved plans (seventeen new plans and five plans re-issued after stone re-engraving). This evidence is not sufficiently clear to make it certain which groups of pages and plans constituted each number before being incorporated in A Collection of Plans of Ports in the East Indies 1775. No ephemeral pages particular to numbers 5 and 6 are known. The groups of letterpress pages are described here in the order in which they appear in a copy in a private collection.

The seventeen new plans are attributed to this grouping because it also includes the introduction which lists the complete collection of 83 plates.

Dalrymple stated in 1783 that Collection of Plans of Ports 1775 had been
completed in six numbers: 'This Collection of Plans was begun to be published in Numbers by Subscription in 1774. ... the 6th Number was published in the beginning of 1775, immediately before my return to India, which was in April of that Year. These Six Numbers contained 78 Plans, from unpublished MSS, besides many Views, on 83 Plates: ...' (General Introduction to a Collection of Plans of Ports 1783, p. 3).

Evidence of surviving copies suggests that the fifth and sixth numbers comprised five groups of letterpress pages and two groups of engraved plans (seventeen new plans and five plans re-issued after re-engraving). This evidence is not sufficiently clear to make it certain which groups of pages and plans constituted each number before being incorporated in A Collection of Plans of Ports in the East Indies 1775. No ephemeral pages particular to numbers 5 and 6 are known. The groups of letterpress pages are described here in the order in which they appear in a copy in a private collection.

The five re-engraved plans are attributed to this grouping as the final modification to the collection. They were previously issued in Plans of Ports in the East Indies 1 1774 (Catalogue A35), but the weakness of the experimental stone engraving caused Dalrymple to have parts of the plates re-engraved, and the plans re-issued to subscribers.

The tabular index includes a 'Sa' [Sandakan] entry for page 147, implying that the index was constructed after the cancellation of U4.

First issue, in 1775.

Second issue, in 1777, for Henry Gregory:

A COLLECTION of PLANS OF PORTS in the EAST INDIES. Published by ALEXANDER DALRYMPLE, LONDON: Printed for the AUTHOR, 1777. Sold by HEAR Y GREGORY, Junior, Mathematical and Optical Instrument Maker, No. 148, nearly opporite the India-Houfe, Leadenhall-Street.

4°: 4π²(4π1) 7π² xB² nB-C4 nD² B-R² S² T*(tT4) U*(tU4) X-Z4 [S2 signed (xB2, nD2, S2), nB signed '2B']

Page numbering: (3), [2] to [4], (2) to (20), (2) to (130), (131), and (132) to (172) centred above text.

The complete A Collection of Plans of Ports, as published in 1775, comprises the six numbers of Plans of Ports in the East Indies, less the discarded preliminary pages from the first four numbers (π² 2π² 3π² 4π² 5π²), plus 12 additional pages to follow page 104 (*O1-032*), and with the substitution of 16 corrected pages (T*(tT4) U*(tU4)). Some plates were re-engraved after the first numbers of Plans of Ports in 1774 and the later states included in copies of Collection of Plans of Ports 1775: strongly re-engraved copies of 740205d Flesh Bay, 7402051 Mossell Bay, 740205a Algoa, 740205r Tollear Bay, and 740205p Socotra (numbers 1, 2, 3, 4 and 13 in the list of plates) represent a deliberate substitution for subscribers.

The Collection was issued with the second version of T-U⁴, corrected in the form after issue in Plans of Ports 4 1774. In this cancelling second version the text for Crotchey on page 133 has three paragraphs (the first beginning 'A Note upon a rough Sketch of Crotchey, says ...'), there are shoulder titles present on all pages, the text for Yulinken includes a list of names from the journal of the Cuddalore to correspond with the engraved plan and ends at the bottom of page 146, and the text for Sandakan ('Report from Lieut. James Barton, Surveyor, at Balambangan') begins on page 147. Though many other minor changes and corrections were made, constant features such as the shape,
position and spacing of en rules in tables, and the low 'n' in 'inland' in the third line of the final paragraph on page 148 show that the text was not set afresh for the second issue in 1775.

The additional pages (001-0032) form addenda to the account on page 98.

The Collection of Plans of Ports, as re-issued by Gregory in 1777, uses the sheets assembled for the 1775 issue, incorporating the 16 corrected pages (T4±T4) U4±U4), but cancelling the title-page and omitting the 12 additional pages following page 104. The text of Proposals, Introduction and Explanation of the Plans is otherwise the same as in the 1775 issue, and notes 3 to 9 of the entry for Collection of Plans of Ports 1775 apply equally here. The eighty-three plans of ports listed on pages 2-5 of the Introduction were not issued by Gregory with this text. Instead he published an augmented fourth edition of New Directory for the East Indies in or after 1776, incorporating impressions of these plates. The compass rose plate and tides diagram were omitted entirely.

CPBT 1792: 1775. 4*: Title, Preface, 88, 16, 16, 13 pages. Collection of Voyages, chiefly in the South Atlantic Ocean, from the Original MSS by Dr. Halley, M. Bouvet, &c. with a Preface concerning a Republican-Colony.

The four constituent parts of South Atlantick Ocean, after the preliminary pages and preface, were printed separately, the first and fourth in London (the first in 1773), the second (in French) in France, and the third (also in French) in Edinburgh. The Edinburgh printing is attributed to Murray and Cochran, who printed the 'Arias Memorial' (Catalogue A30) for Dalrymple in 1773. Only the first and fourth parts have separate title pages. Despite the announcement of publication in the 1773 Advertisement to the first part, no part is known to have been issued separately before the collection was completed with the addition of the preliminary pages and the Preface in April 1775. No earlier publication of any separate part is recorded by Dalrymple.

The Preface gives the reasons for the variety of printers, and explains that much of the letterpress had been printed some years before publication. The preface also includes an annotated transcript of a series of letters from Dalrymple to Lord North in July and August 1772, a 'Plan' dated 3 July/1 August 1772 for an expedition financed by subscription to discover and settle land in the South Atlantic Ocean, and 34 'Fundamental and Unalterable Laws' for such a settlement.

The second plate, though associated with 'Extrait du voyages fait aux Terres Australes', was printed in London in 1775. The third plate, also printed in London in 1775, is not to be associated with any of the
separately printed parts.

The last two leaves of 'Two voyages' contain 'Extract from the geographical description of Terra Magellanica', called for separately as 'La Roché' on the Contents page of the collection as preceding 'Two voyages' but with pagination and register continuous from 'Two voyages'.

CPBT 1792: 1777. 4*. Copies of Papers relative to the Restoration of the King of Tanjour, the Imprisonment of Lord Pigot, &c. Printed by the East India Company for the use of the Proprietors. NB. In this Collection are many Minutes of Council, and some Letters by QD. Not sold.

The two volumes of Copies of Papers were ordered to be printed by the East India Company in April 1777, for the benefit of proprietors, as a collection of documents relating to the Pigot affair. Pigot had committed himself to the reinstatement of the Rajah of Tanjore in his territories in southern India, to the financial detriment of the Nawab of Arcot and his creditors on the Madras establishment. The circumstances of Pigot's arrest at Madras in August 1776, and the implications for constitutional government in Madras of his removal from the governorship by members of his council, rapidly overshadowed, for Company proprietors in London, the question of the restoration of the Rajah of Tanjore to his estates. Dalrymple returned precipitately to London as Pigot's emissary and spokesman, while James Capper returned with letters defending the conduct of the council members who had supplanted Pigot. Dalrymple's particular contribution was his letter of 19 January 1777 from Alexandria, bringing the whole matter to the Company's notice. This was printed as the first item in the second volume. Information of the details of Pigot's arrest began to arrive in London with Dalrymple's letter on 17 March, and Dalrymple himself reached London on or shortly before 21 April.

The first volume printed official minutes and consultations, and the second volume the correspondence and other papers received in London in April 1777. The decision to print was taken at the General Court of 23 April 1777, and the report of this Court itself occupies pages 2291 to 316 of the second volume.

A pamphlet controversy developed in London in April and May 1777,
each side producing handbills, flysheets and pamphlets glossing and interpreting documents from the common source-books *Copies of Papers*. Dalrymple and Admiral Hugh Pigot were among the chief protagonists for Pigot. Dalrymple's contribution cannot be separated from Hugh Pigot's in publications over the latter's name, but a group of pamphlets can be identified as having Dalrymple as author (Catalogue A47-A53 and A58). As a Madras council member present in London in 1777 Dalrymple was in a unique and influential position in the controversy.

In volume I there is no catchword on page 482, but no apparent hiatus in the text between page 482 and page 509. In volume II there is no catchword on page 1292. In volume II the catchword 'the' on page 2290 carries the text over to page 317. The report of the 23 April 1777 Court was an interpolation, and is the item most frequently missing or bound out of place. In volume II page 457 has 'THE END'.

This pamphlet is a preliminary version of the memorial printed in Letter to the Court of Directors of the East India Company of 19 June 1777 (Catalogue A53). Dalrymple criticised the General Court decision of 9 May 1777 ordering the Madras council members home, particularly in the light of the arrangements made for the government of Madras in their absence.

CPBT 1792: 1777. 4°. Several other pieces on the same Subject written by GD, were printed by Admiral Pigot and GD but not sold; Those particularly by GD are: [...] 11 pages. Letter to the Court of Directors. 19th June 1777. Memorial to the Court of Directors. 19th June 1777.

The memorial reprinted, for submission to the Court of Directors, the pamphlet On the 26th March a general Court ... of 16 June 1777. In the covering letter Dalrymple justified the submission of the memorial by the poor attendance at the General Court to which the pamphlet had been first directed.
In proposing to use ships' journals to determine the best shipping routes at different seasons, Dalrymple advanced here a design of journal form to facilitate the future provision of the required data. He advocated chart construction based on chronometer runs from a series of places of known longitude, which he tabulated. For the blank chart which he specified, see Catalogue B135 780000a. The form of journal is printed at the foot of page 6.

This scheme was incorporated in, and superseded by, Dalrymple's official proposal for journal-keeping in *The East-India Company having thought proper to employ me ...* 1779 (Catalogue A60).

A Map of the EAST INDIA COMPANY'S Lands on the COAST of CHOROMANDEL, From an actual SURVEY made at the COMPANY’s expence by Thomas Bernard. Published with the EAST INDIA COMPANY's approbation, by Alexander Dalrymple. 1778. [Catalogue B143 790301]

Dalrymple's advertisement explained that, after the map had been reduced from 2 inches to 1 mile, the scale of Barnard's original survey, to 2½ miles to 1 inch for publication, it was inexpedient to insert all the place names on the reduced map except by a key. The Explanation serves as a place-name index, arranged both in the order in which the names appear, from south-west to north-east, and in alphabetical order. The names are keyed to the map by a system of mileage measurement explained in the advertisement. To assist this Dalrymple provided an engraved strip repeating the east-west mileage graticule and designed to be used loose on the face of the map.

The map is found issued with the Explanation, though not bound with it.

Dalrymple issued this prospectus shortly after his appointment by the East India Company. He proposed a series of five charts for the short-term needs of Company shipping, and a longer series of twenty-seven coastal charts for the navigation to the East Indies. His introductory notes announced his intention of indexing the collection of ships' journals at East India House, and he offered his design of journal forms (see Catalogue A60) to captains wishing to provide him with coherent series of observations from future voyages.

Plates: Two plates of journal forms:

[Journal form, with each day's entry running across two pages, headed 'JOURNAL of'.]

[Journal abstract, in single page form repeated on the plate, incorporating a column headed 'Remarks, Bearings and Occurrences'.]

On his appointment by the East India Company to examine the ships' journals, Dalrymple republished his scheme for journal-keeping (Catalogue A54: A Comparison of the Several Tracks ... 1778) for Company use. For this he had journal forms engraved to match his specifications, and proposed their use, together with two forms of blank chart, a general chart graduated at 5° to 1 inch on the Mercator projection, and a plane chart at 2° to 1 inch for the equatorial Atlantic Ocean.

This pamphlet is remarkable for the introduction by Dalrymple of a form of wind scale derived from John Smeaton's experience with windmills. Though Dalrymple reprinted his specifications and forms as 'Form of the Journals of the East India Company Ships' in the first issue of the new 1806 edition of Essay on Nautical Surveying (Catalogue A232), it was from this 1779 pamphlet that Sir Francis Beaufort adopted Dalrymple's wind scale as his own in 1806.

The list of scientifically determined longitudes with which Dalrymple concluded his pamphlet represented an increase to 36 places from the 28 given in A Comparison of the Several Tracks ... 1778.
The advertisement on page [2] reads: 'Advertisement. In the following Sheets the Author has made Use of his former Publications, particularly of A General View of the East-India-Company, Written in January 1769, and published 1772.' This pamphlet marks Dalrymple's return to his theme of government regulation of East India Company finances, and is thus connected with his previous publications on India affairs. The disrespectful dedicatory epistle copies that in Considerations on the Present State of Affairs 1778 (Catalogue A58).

In his introductory letter to the Court of Directors, Dalrymple advanced,
as a reason for pamphleteering, his inability prudently to maintain a
sufficient Company stockholding to qualify him to speak in General
Courts. He continued to argue for maintaining the commercial
independence of the East India Company from government involvement,
and set out the 'Heads of an Agreement' to achieve this.

Contents: 1 title; 2 blank; 3-5 text begins 'To the Publick. The following Account of the Going of my Pocket Chronometer, ...'), dated by Arnold, 2 Adam Street, Adelphi, 20 April 1780 (4), and followed by testimonials; 6-12 The Going of Arnold's Pocket Chronometer from Day to Day in different Positions

This second issue of John Arnold's An Account in 1780 differed from the first in including an introduction with testimonials in the names of users of Arnold's chronometers, as a preface to the tables of going. Dalrymple's connection with this issue of An Account is deduced from his known connection with Arnold from 1778 onwards, from his increasing involvement as the editor of pamphlets publicising or defending Arnold's chronometers (Catalogue A77, A179 and A226), and his coining of the word 'chronometer' (Catalogue A64: Some Notes useful to those who have Chronometers at Sea [1780]).

The first issue of An Account in 1780 comprised only a title-page and tables of going, and its publication is therefore not thought to have involved Dalrymple significantly.

The substance of Some Notes useful was re-published in Instructions concerning Arnold's Chronometers, or Time-keepers 1788, pages 3 to 8 (paragraphs 1-10 and 16-40) and pages 9 to 12.

Some Notes useful is dated to 1780 by its association with An Account ... of the Going of a Pocket Chronometer 1780 (Catalogue A63), by the footnote coining the term 'chronometer', and by reference in the same footnote to 'Mr. Banks' before the grant of his baronetcy in 1781.

The Collection provided the introductory and explanatory material for the first two annual collections of plans and views of land which Dalrymple published for the East India Company, between April 1779 and March 1780, and between April 1780 and March 1781. Dalrymple used the introduction to narrate the circumstances of his appointment by the East India Company in 1779: the plans and views of land listed on pages 2 to 5 of the introduction represented his statement of work done.

The publication of the plans and views of land generally preceded the publication of the letterpress, and were not issued bound together with it. This was a deliberate change from the practice Dalrymple had employed with the issue of A Collection of Plans of Ports in the East Indies 1775 to subscribers. In 1781 plans and plate of views were priced individually, according to the Advertisement on page [4] of the Collection.

The plans and views of land issued to form the collections for 1779-80 and 1780-81 are indicated in Catalogue B by the notation 'CVLPP 1781, 1779 list' and 'CVLPP 1781, 1780 list' respectively.

In the introduction to Collection Dalrymple also printed lists of the 83 plans from 1774-75 and of 11 charts and 8 views from 1769-72. These are indicated in Catalogue B by the notation 'CVLPP 1781, 1775 list'.

The plates originally issued with the first edition of a Collection of Plans of Ports (Catalogue A44) were not re-issued bound with this edition, though 81 of the 83 plates were listed on pages 4 to 7 of the introduction. Instead they were available for purchase separately and individually, as they had been since at least 1781. Consequently it is normal to find this edition without plates.

Two of the 1774-75 plates were withdrawn before 1782: Catalogue B48 740205k Mohila and B68 740225j Nattal. Two others were replaced with new plates: Catalogue B50 740205m Point Romania and B51 740205n Po Pinang, replaced with Catalogue B269 820102 Point Romania and B265 811217d Po Pinang. The compass-rose plate (Catalogue B58 740205u) was also withdrawn, as the system of radial lines had been engraved on each plan between neatline and border.

Dalrymple used the revised introduction to narrate the circumstances of his appointment by the East India Company in 1779 and his confirmation in 1780, and to list (pages 34 to 37) the contents of his annual collections of published plans, views and charts for 1779-80, 1780-81 and 1781-82. The plates of these latter years are not described in the text of this Collection; see instead Collection of Views of Land and Plans of Ports in the East Indies 1781 (Catalogue A70) for descriptions of plates published in 1779-80 and 1780-81, and Collection of Charts, Views of Land and Plans of Ports in the East Indies 1783 (Catalogue A80) and Explanations to Plans of Ports, &c. 1784 (Catalogue A89) for descriptions of plates published in 1781-82 and later years.

The plans and views of land issued in 1774-75 are indicated in Catalogue B by the notation 'CPP 1782'. The plans, views of land and charts issued to form the publications for 1779-80, 1780-81 and 1781-82 are indicated in Catalogue B by the notations 'CPP 1782, 1779 list', 'CPP 1782, 1780 list', and 'CPP 1782, 1781 list' respectively.

First issued with Memoir concerning the Passages to and from China 1782 (Catalogue A72), this pamphlet serves as the explanation for plan published separately (Catalogue B298 820615 Strait of Allass).

The second setting is a type-facsimile re-setting of the first, apart from the footnote symbol in the title. It is thought to have been issued in or shortly before 1787.
AN ANSWER FROM JOHN ARNOLD TO AN ANONYMOUS LETTER ON THE LONGITUDE 1782

The text of 'An Answer' (pages 5 to 16), ending 'I wage no War with Bedlam', was written as a narrative with Arnold as first person, but in Dalrymple's style. It is attributed to Dalrymple as the first piece in a 'family' of three justifications of Arnold's chronometers. The two later pieces are Certificates and Circumstances relative to the Going of Mr. Arnold's Chronometers 1791 (Catalogue A179) and Longitude. A Full Answer to the Advertisement concerning Mr. Earnshaw's Timekeeper 1806 (Catalogue A226).

The first priced catalogue lists Dalrymple's engraved publications to April 1783. It is in seven sections, comprising 202 plates of 'Plans of Ports', 37 of 'Views', 9 of 'Charts [which] will bind up with the Plans', 19 of 'Charts', 3 of 'Maps', 6 of 'Views not Nautical', and 2 of 'Plans not relative to the Indian Navigation'.

The maps, charts, plans and views are indicated in Catalogue B with the notation 'LPP 1783'.

Also issued in Collection of Charts, Views of Land and Plans of Ports 1783 as a preliminary leaf.
COLLECTION OF CHARTS, VIEWS OF LAND AND PLANS OF PORTS IN THE EAST INDIES 1783

COLLECTION of CHARTS, Views of LAND and Plans of PORTS in the EAST-INDIES. Published at the Charge of the EAST-INDIA COMPANY by Alexander Dalrymple. LONDON, 1783.

4°: π1 χ1 A–I2 [$1 signed]
20 leaves, pp. [2] [2], 1–36 [= 40]
Page numbering: (1) to (36) centred above text

The Collection provided the introductory and explanatory material for the third and fourth annual collections of plans, charts and views of land which Dalrymple published for the East India Company, between April 1781 and March 1782, and between April 1782 and March 1783, and for the separate group of plans, charts and views of land 'finished by special order during the course of the War'. These were listed in three groups on pages 1–6. The first group, the publication for 1781, comprised 32 plates of plans, 1 of views and 2 of charts. The second group, the publication for 1782, comprised 26 plates of plans, 8 of charts and 1 of views. The third, 'special order' group comprised 28 plates of plans, 8 of charts and 14 of views.

This Collection serves as an introduction to Explanations to Plans of Ports, &c. 1784 (Catalogue A89), and is analogous in content to the introductory sections in A Collection of Plans of Ports in the East Indies 1775 (Catalogue A44 and A75) and Collection of Views of Land and Plans of Ports 1781 (Catalogue A70).

As with the 1781 Collection (Catalogue A70), the publication of the plans, charts and views of land preceded the publication of the letterpress, and were not issued bound together with it. Plans, charts and views of land were available separately, and priced individually, according to List of Plans of Ports, &c. 1783.

The plans and views of land issued to form the collections for 1781–82 and 1782–83, and the 'special order' collection, are indicated in Catalogue B by the notations 'CCVLPP 1783, 1782 list', 'CCVLPP 1783, 1783 list' and 'CCVLPP 1783, special war list' respectively.
An ACCOUNT of the LOSS of the GROSVENOR INDIAMAN 1783: First edition

An ACCOUNT of the LOSS of the GROSVENOR INDIAMAN, commanded by Capt. John Coxon, on the 4th August, 1782 (inferred from the Portuguese Description of the Coast of Africa to have happened between 28° and 29° S.) with a Relation of the Events which befel those Survivors who have reached England, viz. Robert Price, Thomas Lewis, John Warmington, and Barney Larey. Being the Report given in to the EAST-INDIA-COMPANY by ALEXANDER DALRYMPLE, Esq. Published with the Approbation of the Court of Directors. LONDON, 1783. Sold by P. ELMSLY, and C. NOURSE, in the Strand; J. SEWELL, Cornhill; and J. LAW, St. Martin's Church-Yard.

Page numbering: 4 to 8 at outer end of running title lines; (2) to (39) centred above text

Contents: 1 title; 2 blank; 3-8 Advertisement, dated by Dalrymple 14 August 1783 (3); 1-40 An account of the loss of the Grosvenor Indiaman, on the 4th of August, 1782, with a relation of the events which befel those survivors who have reached England, viz. Robert Price, Thomas Lewis, John Warmington, and Barney Larey.

CPBT 1792: 1783. 8°: Title and Advertisement 8, 39 pages. Account of the Loss of the Grosvenor.

Because of faults of timing and losses of other ships, the Grosvenor was obliged in 1782 to make a return voyage from Bengal alone, rather than in company with other returning ships. Her subsequent wrecking on the southern coast of Africa appeared to have been caused by navigational or chart error, and Dalrymple was appointed to conduct the official enquiry.

A revised and expanded second edition of his Account was published in 1785 (Catalogue A100).
When Dalrymple proposed, in 1783, to re-arrange his plans, charts and views of land published before April 1783 into a new format, without navigational information, for general sale as a geographical work, he intended General Collection to serve as a preface to General Introduction to a Collection of Plans of Ports &c. in the Indian Navigation 1783 (Catalogue A83), A Collection of Views of Land in the Indian Navigation 1783 (Catalogue A84), and an introduction to charts which was never completed.

In this general preface Dalrymple continued his advocacy of Arnold's chronometers, particularly as a means of establishing the relative positions of prominent headlands, from Collection of Views of Land and Plans of Ports 1781 (Catalogue A70) and the 1782 second edition of A Collection of Plans of Ports in the East Indies 1775 (Catalogue A75).

The asterisk note on page 9 was cancelled by a slip (incorporating the 'D' signature) giving a new form of the note in 11 lines.

NMJ 1789 #1: General Introduction to the Collection of Plans, ©D.
Pages 1 to 104. 10s.6d. [priced with A82 and A84]

Intended, with A Collection of Views of Land in the Indian Navigation (Catalogue A84), and prefaced by General Collection of Nautical Publications (Catalogue A82), to serve as an introduction for purchasers of the collection of charts, views and plans as a geographical work. The text is an amalgamation of the notes of provenance and description from the introductory sections of A Collection of Plans of Ports 1775 (Catalogue A44 and A75) and Collection of Views of Land and Plans of Ports 1781 (Catalogue A70), and from Collection of Charts, Views of Land and Plans of Ports 1783 (Catalogue A80).

This work includes (pages 17-30) 'List of Plans of Ports. &c. in the Indian Navigation, published by ©D', comprising 267 plates. This list includes all the plates which Dalrymple had published up till April 1783, together with others in progress and planned for issue in 1783-84, as
well as some in course of compilation. Though given in the format of previous annual lists of published plans, charts and views, this list is unsatisfactory and inconclusive as a statement of Dalrymple's achievement. Plans from this list which can be identified as published are indicated in Catalogue B with the notation 'GICPP 1783'.

No plates were specified to be bound with this General Introduction as issued. Instead purchasers could obtain plans individually or in sets as they wished. Consequently it is normal to find General Introduction without plates.

Dalrymple's acceptance of Fleurieu's insistence that he should not be named in print as the provider of D'Après' manuscript plans occurs in his two letters of 2 March and 6 April 1784 to Fleurieu (Paris, Bibliothèque de l'institut de France: MS. 2325 (NS cccxxv), 20 and 25).

The introduction to these Explanations was published as Collection of Charts, Views of Land and Plans of Ports 1783 (Catalogue A80), where the plans, charts and views of land of the 1781-82, 1782-83 and 'special war list' collections are listed. Otherwise these Explanations are analogous with the explanations in A Collection of Plans of Ports 1775 (Catalogue A44) and Collection of Views of Land and Plans of Ports 1781 (Catalogue A70).

A second edition of the Explanations was published in 1787 (Catalogue A145).
In his subjective summary of the history of East India Company administrative practices, written in the context of the 1784 India Bill, Dalrymple printed, on pages 24 to 32, an extract from *A Second Letter concerning the Supervisorship 1769* (Catalogue A9).

In the advertisement on page 88 Dalrymple offered, besides *A Short Account of the Gentoo Mode of Collecting the Revenues 1783* (Catalogue A86), his collections of maps, charts, plans, and views, as detailed in *List of Plans of Ports, &c. 1783*, at 'set' prices, and announced that a further set of Indian views was intended to be published.
Dalrymple drew up this Case to support his application to be exempted from the provision of the 1784 India Bill that East India Company servants absent from India for more than five years could not return to office in India without the consent of a three-fourths majority of a General Court. He objected to the implication that continuing in his appointment 'to examine the ships' journals' should place him on equal terms with those who might apply for reinstatement after dismissal.

'Memoir of a Survey of the Coast of Choromandel' was also published separately as Proposition for a Survey of the Coast of Choromandel 1784 (Catalogue A92).

An Hydrographical Journal was also issued, with Appendix to Capt. Ritchie's Survey of the Bay of Bengal 1785 (Catalogue A95), under the collection title Collection of Nautical Papers concerning the Bay of Bengal 1785 (Catalogue A94).

A second edition of An Hydrographical Journal was published in 1787 (Catalogue A131), and a third edition in 1807 (Catalogue A244).
COLLECTION OF NAUTICAL PAPERS CONCERNING THE BAY OF BENGAL
1785: First edition

Collection of Nautical Papers serves as a preface to the two items which form the collection: An Hydrographical Journal of a Cursory Survey of the Coasts and Islands in the Bay of Bengal 1784 (Catalogue A93) and Appendix to Capt. Ritchie's Survey of the Bay of Bengal 1785 (Catalogue A95).

The plans and charts specified in 'List of Plates belonging to the Collection' on page ii were not issued bound in the Collection, An Hydrographical Survey, or the Appendix. They were available individually to purchasers at Dalrymple's usual prices, and consequently the Collection is normally found without charts or plans.

The 28 plans and charts listed are: Catalogue B428 841200 Chittigan, B456 850414 Islamabad, B446 850118 Khaut Colley, B453 850219 Chittigong, B452 850214b Chittegan, B425 841117b Arrackan & Chettigon, B436 841217a Arrackan, B424 841117a Aracan & Ava, B426 841124 Arackan River, B450 850201 Aracan & Ava, B447 850121 Arracan, B431 841207 Arrackan River, B430 841204 Ava, B433 841211b Ava, B440 841227 Ava, B427 841127 Negrais, B422 841101b Negrais, B423 841104 Negrais, B444 850113 Andaman Islands, B438 841218 Andaman, B432 841211a Andaman Islands, B435 841211d Streatham, B439 841223 Andamans, B437 841217b Nicobar Islands, B441 841229 Nicobar Islands, B448 850124 Nicobar Islands, B391 840704 Choromandel, and B434 841211c Choromandel.

A second edition of the Collection, with its constituent parts, was published in 1787 (Catalogue A130), and a third edition in 1807 (Catalogue A243).

The Mémoire consists of a critical evaluation by Dalrymple of a chart and a memoir by D'Aprés de Mannevillette. The memoir ('Carte des isles & dangers situés au nord-est de Madagascar entre le 4 & 8° de latitude méridionale, & le 68 & 75° de longitude orientale', in J.-B. N. D. D'Aprés de Mannevillette, Supplément au Neptune Oriental (Paris, 1781), cols. 2–4) was translated by Dalrymple as 'Memoir of a Chart of The Islands and Dangers to the N.E. of Madagascar, Between 4. & 8. S. Lat. & 68. & 75' E Long. from Paris, By M. D'Aprés' on pages 25–30 of this Mémoire. The chart was republished by Dalrymple at a reduced scale and sold separately: Catalogue B398 840811 Islands North East of Madagascar. The last part of the Mémoire (pages 31–32) consists of a translation of an extract from J. R. de Grenier, Mémoires de la Campagne de Découvertes dans les Mers des Indes (Brest, 1770), concerning the 'Islands of Adu'.

Dalrymple used footnote 'c' on page 2 of the Mémoire to announce in print the results of his examination of the 'Dauphin' map, then in the possession of Sir Joseph Banks who presented it to the British Museum in 1790 (British Library: Add. MS. 5413). The 'circumstances of correspondence' (in Dalrymple's words) between parts of the 'Dauphin' map and James Cook's observations on the east coast of Australia have aroused controversy (see H. T. Fry, 'Early British interest in the Chagos Archipelago and the Maldive Islands', The Mariner's Mirror 53 (1967), pp. 343–356, especially pp. 353–356). Dalrymple later published an engraving of the 'Dauphin' map: Catalogue B533 870824 Antient MS.
MEMOIR OF A CHART OF THE CHINA SEA 1771: Second edition 1786

4°: A² B-D² [$1 signed]
8 leaves, pp. i-iii iv 1 2-12 [= iv, 12]
( iv ) and ( 2 ) to ( 12 ) centred above text

Contents: i title; ii blank; iii-iv Advertisement, dated by Dalrymple 10 February 1786 (iv); i-12 Memoir of a Chart of the China Sea. Scale 1 Inch = 1", dated April 1771 (12)

NMJ 1789 #17.3: Memoir of a Chart of the China-Sea. 1771, 2d Edit. 1786. Title Page and Advertisement, 4 P., Pages 1 to 12. £1.1s. [priced with A106-A111, A124 and A141].

The first edition of the Memoir was published in 1771 (Catalogue A13). The second edition incorporated revisions, following successive revisions to the chart (Catalogue B34 710419), which continued to be available separately. A postscript, China Seas (Catalogue A124), was dated by Dalrymple to 1787, though called for in the text of the second edition of the Memoir. The third edition of the Memoir, published in 1787 for Henry Gregory (Catalogue A137) includes a re-setting of 'China Seas' in its register and pagination.

The chart (Catalogue B34 710419) continued to be available separately, but was not issued with second edition of the Memoir.

Page numbering: 4 to 12 at outer end of running title line

Contents: 1 title; 2 blank; 3-12 Memoir of a Chart of the Straits of Sunda, &c., dated 21 February 1786 (3) and subscribed by Dalrymple (12)

NMJ 1789 #14.1: Memoir of the Chart of the Straits of Sunda and Banka, Ø. 1786. Title Page, Pages 1-12. 5s. [priced with A105 and A150].

In the Memoir Dalrymple desribed and evaluated his sources for the chart (Catalogue B454 850403 Straits of Sunda & Banka). The Appendix to Memoir of Chart of Sunda and Banka (Catalogue A105), printed separately but often associated with the Memoir, printed the ships' journal extracts which Dalrymple used.

A second edition of the Memoir, without significant change to the text, was published in 1787 (Catalogue A134).

Dalrymple published the chart separately in 1785. It was not issued bound with the Memoir until Dalrymple's marketing exercise of 1806, and consequently it is normal to find the Memoir without the chart.

Page numbering: [ iv ] and ( v ) to ( xxxvi ) centred above text

Contents: i title; ii blank; iii-xxxvi General Introduction to the Second Edition of Memoirs and Charts

NMJ 1789 #17.1: General Introduction to the Charts and Memoirs published by C. D. 1772, 2d Edit. 1786. Title Page, Pages 1 to 30. £1.1s. [priced with A103, A107-A111, A124 and A141].

The first edition of General Introduction was published, as part of A Collection of Charts and Memoirs, in 1772 (Catalogue A22). The second edition incorporated revisions, particularly annotations to
Dalrymple's list of his manuscript chart collection to show which he had published. Dalrymple re-issued the *General Introduction* to preface new editions of the six 1771 memoirs (Catalogue A103 and A107-A111) in 1786.

The second state a number of typographical errors were corrected on pages ix to xvi.

The charts originally issued with *A Collection of Charts and Memoirs* continued to be available in 1786, but were not issued with *General Introduction* or the other memoirs. They were: Catalogue B34 710419 China Sea, B33 710121 China, B13 691020b Borneo, B15 701130 Felicia, B36 711210 Sooloo Archipelago, and B14 691026 Cuddalore/Palawan. Consequently it is normal to find *General Introduction* without plates.
ESSAY ON NAUTICAL SURVEYING 1771: Second edition 1786

INSTRUCTIONS CONCERNING THE CHRONOMETERS ... SENT TO BOMBAY 1786

INSTRUCTIONS concerning the CHRONOMETERS, or TIME-KEEPERS, sent to BOMBAY, 1786.

4°: 2 leaves
2 leaves, pp. 1 2-4 [= 4]
Page numbering: ( 2 ) to ( 4 ) centred above text

Contents: 1-4 Instructions concerning the Chronometers, or Time-keepers sent to Bombay, 1786

Dalrymple drafted these Instructions for use with the chronometers which he had been permitted to send to Bombay to facilitate McCluer's survey of the west coast of India. He later incorporated part of the instructions on the care, maintenance and winding of chronometers in Instructions concerning Arnold's Chronometers, or Time-keepers 1788 (Catalogue A153), pages 1 to 2.

Contents: [1] title; [2] blank (with Errata slip pasted on); 1-2 Introduction, dated 10 March 1786 (1) and subscribed by Dalrymple; 1-30 Memoir of a Chart of the Carimata Passage (including, pp. 2-10, a printing of the an earlier unpublished Memoir of a Chart of Carimata Passage and of the Natunas and Anambas)

NMJ 1789 #16: Memoir of a Chart of the Natunas, Anambas, and adjacent Islands, 8d. 1786. Title Page, Errata, Introduction 2 p., Pages 1 to 30. 2s.

The Memoir evaluates sources for an unpublished chart, of which only proof copies from the unfinished plate now survive: see Catalogue B187 800600 Carimata Passage. The reason for the publication of the Memoir, and its continued advertisement for sale until at least 1789, while the chart remained unfinished, is not clear. Dalrymple had had considerable difficulty establishing the reciprocal positions of the islands south-west of Borneo, and had tried to overcome this with a large slip chart. The Memoir represents a statement of unsatisfactory progress.

In the title-page transcription the words 'of the' and 'and adjacent' in the title are set in a smaller fount.

The Memoir was normally issued with an errata slip pasted on page [2].

Contents: (1) title; (2) blank; (3) table of classes and quantities of plates; (4) Memorandum; 1-36 List of Plans of Ports, &c. in the Indian Navigation, published by &D.; 37-52 Alphabetical List of Plans of Ports, &c.

NMJ 1789 #18.4: List of Classes into which are distributed The Plans of Ports and Alphabetical Lists, published on or before April, 1786. Title Page, List of Classes, Mem., List of Plates Pages 1 to 52. 4s. NB. These Lists have been annually completed by Slips to be pasted on.

This was the first comprehensive list which Dalrymple published of his own plans of ports, after List of Plans of Ports, &c. 1783. He divided the East Indies navigation into eighteen geographical areas, and maintained this arrangement of his plans until 1804. For each plan he gave the scale, country of origin, subject, geographical location, draughtsman or surveyor, source and date.

Plans entered in the List of Classes are indicated in Catalogue B by the notation 'LCPP 1786'.

Sheets of addenda slips were issued annually until 1794 for purchasers to cut up and paste into their (sometimes interleaved) copies of List of Classes: for these annual addenda see Catalogue A116, A146, A147, A155, A161, A170, A182, A187, A195 and A206.

The table of classes and quantities of plates records 347 plates of plans in 18 classes: this does not correspond in all cases with the figures in the detailed lists.
LIST OF CLASSES INTO WHICH ARE DISTRIBUTED THE PLANS OF PORTS, &c. 1786 [YEAR 7 ADDENDA 1786]

[ Begins: ] To be cut into slips and pasted in their proper places.

4º: 1 leaf

1 leaf, pp. [2]

Contents: [1] list of addenda for year 7, and errata note; [2] blank

The list of addenda for year 7 comprised 17 plates of plans. It was designed to be cut into slips and pasted into the purchaser's copy of List of Classes into which are distributed the Plans of Ports &c. 1786. Plans entered in this addenda list are indicated in Catalogue B with the notation 'LCPP 1786, year 7 addenda [1785-86]'.

Dalrymple's publishing and accounting year was changed in 1786 to end on 1 June instead of 1 April. The addenda list for year 7 represents those plans published in the last part of the fifteen-month 'year' which brought him onto the new schedule.
AN ACCOUNT OF THE NAVIGATION BETWEEN INDIA AND THE GULPH OF PERSIA 1786

An ACCOUNT of the NAVIGATION between INDIA and the GULPH of PERSIA, at all Seasons, with NAUTICAL INSTRUCTIONS for that GULPH, by Lieutenant John McCluer. Published at the Charge of the East India Company. By Dalrymple. LONDON: Printed by GEORGE BIGG, 1786.

Page numbering: (v) to (lvi), (vi) and (2) to (98) centred above text

Contents: i title; ii notice postponing publication of views; iii dedication, dated by Dalrymple 72 Titchfield Street, 8 August 1786; iv blank; v-lvi Introduction, dated 29 May/8 July 1786 (v) and 12 August 1786 (xxii); [1]-[6] comparative tables of names; v-vi Preface, by John McCluer; 1-38 Memoir concerning the Navigation between India and the Persian Gulph; 39-45 The Description, of the fourteen following Islands in the Gulph of Persia, is taken from Lieutenant John Cant's Observations. Received from Lieutenant John McCluer; 46 A Description of the Islands, Keyn and Zazarine, taken by Captain Moore, in the Ship Dragon. April 1757; 47 Extract of a Letter from Lieutenant John McCluer, dated Bussorah, 25th October, 1785; 48-51 tables of passages; 52-56 Niebuhr. Description of Arabia. P. 287; 57-72 extract from John Thornton, The English Pilot (1703), dated 14 August 1786 (57); 73-78 From Manoel Pimentel, Arte de Navegar, p. 475. Edit. 1762; 79-86 From Nathaniel Cutler, General Coasting Pilot, P. 100. London, 1728; 87-97 From "An Account of the Winds, &c. in the East Indies." by Capt. David Rannie; 97 From the French MS Chart of the Gulph of Persia; 98 From Lieutenant McCluer, dated March 15th, 1784; [1]-[4] Errata & Addenda

The Account was compiled in two parts, the first in May-July 1786 and the second in August 1786. The division is indicated by new marginal dates, on page xxii of the Introduction and page 57 of the text.

The first part of the Account printed McCluer's 'Memoir' (pages 1 to 38), other papers communicated by him to Dalrymple (pages 39-51), and Dalrymple's translation of an extract from C. Niebuhr, Description de l'Arabie (Copenhagen, 1773, Amsterdam, 1774 or Paris, 1779) (pages 52 to 56).

McCluer's Preface to his 'Memoir' indicated that he supplied it to Dalrymple together with the manuscript materials for the charts which
he later engraved. Dalrymple published a number of representations of
the Persian Gulf in his plans series in early 1787. The plates he
published in 1786 from McCluer's manuscripts were not issued with the
Account, but in some cases have been attached by purchasers: Catalogue
B490 860620 Persian Gulph/Muscat, and B498 860820 Gulph of Persia.
Dalrymple later published a number of other charts, plans and views
from McCluer's observations.

Dalrymple's introduction to the first part of the Account printed
extracts from letters written by McCluer subsequent to his 'Memoir'
(pages vii-xvii), an extract from Niebuhr on Muscat (pages xvii-xix),
and a comparison by Dalrymple of previously known charts of the
Persian Gulf (pages xix-xxii). The second part of Dalrymple's
introduction printed his investigation of early accounts of the Persian
Gulf, which resulted in the extracts on pages 57 to 97 of the Account,
a new comparative table of latitudes, journals and observations of two
voyages and an account of Basra.
A SERIOUS ADMONITION TO THE PUBLICK ON THE INTENDED
THIEF-COLONY AT BOTANY BAY 1786

A SERIOUS ADMONITION to the PUBLICK, on the Intended
THIEF-COLONY at Botany Bay. LONDON: Printed by GEORGE BIGG,
For JOHN SEWELL, at the Corner of Cooper's Court, Opposite the

8°: A4 B-F4 G2 [§2 signed (-G2)]
26 leaves, pp. 1-3 4-52 [= 52]
Page numbering: (4) to (52) centred above text

Contents: 1 title; 2 blank; 3-36 Serious admonition to the publick, dated
3 September 1786 (3) and October 1786 (36); 37-52 Extract from Mr.
Dalrymple's Explanation of Plans of Ports

CPBT 1792: 1786. 8°: 52 pages. A serious Admonition to The Publick
on the intended Thief-Colony at Botany Bay.

Dalrymple combined arguments against the settlement of Norfolk Island as
a source of cordage, and against the insecurity of a convict settlement
at Botany Bay, to urge the use of Tristan da Cunha as a nearer convict
settlement. A letter of 13 July 1785 from Dalrymple to the Court of
Directors is printed on pages 8 to 17.

The sources used in the extract from Explanation of Plans of Ports, &c.
(Catalogue A89) are: 'The English Pilot for the Oriental Navigation,
commonly called The Wagoner' (page 37); 'An Account of Tristan da
Cunha by Capt. Francis Cheyne' (page 39); 'Observations made on the
Islands Tristan da Cunha by the Sieur Donat on board the Packet
l'Heure du Berger on the passage to Mauritius in September 1767'
(page 41); 'Extract of the Journal of L'Etoile du Matin, M. D'Etchevery'
(page 44); '... translation of a Dutch MS. in possession of Sir Joseph
Banks Bart.' (page 48).
A BRIEF STATEMENT OF THE PREVAILING WINDS 1782: Second edition 1787

A Brief Statement was first published in 1782 (Catalogue A73), and included 'Capt. Taylor's Remarks in Ship Ceres', which was reissued separately in 1787 (Catalogue A120). Apart from the removal of 'Capt. Taylor's Remarks', A Brief Statement was not significantly revised for the second edition.

Second state, with page numbers added:

Contents: [1]-12 Capt. Taylor's Remarks, in Ship Ceres

Previously issued in 1782 as part of A Brief Statement of the Prevailing Winds (Catalogue A73), Capt. Taylor's Remarks were published and paginated separately in 1787 in order to facilitate binding apart from A Brief Statement in geographically-ordered collections of Dalrymple's letterpress. Capt. Taylor's Remarks refer specifically to the Bay of Bengal, and Nautical Memoirs and Journals 1789 includes them in that position. The text was not altered for this second edition.

The Memoir was first published in 1772 (Catalogue A23), and was not significantly revised for the second edition. The chart (Catalogue B37 720915) which accompanied with the first edition was not issued with the second edition, though it was available separately among Dalrymple's charts. Consequently the second edition of the Memoir is normally found without the chart.
COLLECTION OF NAUTICAL PAPERS, CONCERNING THE BAY OF BENGAL
1785: Second edition 1787

COLLECTION of NAUTICAL PAPERS, concerning the BAY of BENGAL,
Published at the Charge of the EAST INDIA COMPANY, from the MSS.
by DALRYMPLE. 1785. SECOND EDITION LONDON: Printed by
GEORGE BIGG, 1787.

4°: 2 leaves
2 leaves, pp. [4]

The Collection was first published in 1785 (Catalogue A94). The 'List of Plates' was revised, with the addition of old and new plates, for the second edition.

The second edition of Collection of Nautical Papers serves as a preface to the second editions of the two items which form the collection: An Hydrographical Journal of a Cursory Survey of the Coasts and Islands in the Bay of Bengal 1784 (Catalogue A131) and Appendix to Capt. Ritchie's Survey of the Bay of Bengal 1785 (Catalogue A132).

The plans and charts specified in 'List of Plates concerning the Bay of Bengal ...' on pages [3]-[4] were not issued bound in the Collection, An Hydrographical Survey, or the Appendix. They were available individually to purchasers at Dalrymple's usual prices, and consequently the Collection is normally found without charts or plans.

The 45 plans and charts listed are: Catalogue B37 720915 Bay of Bengal, B434 841211c Choromandel, B391 840704 Choromandel, B284 820319b Kannaka & Codgone, B466 851121a Bengal/Putnay, 851121b Megna River, B285 820319c Bomeeny, B428 841200 Chittigan, B456 850414 Islamabad, B452 850214b Chittegan, B425 841117b Arrackan & Chettigon, B453 850219 Chittigong, B446 850118 Khaut Colley, B436 841217a Arrackan, B447 850121 Arracan, B426 841124 Arackan River, B39 740205b Arackan River, B431 841207 Arrackan River, B450 850201 Aracan & Ava, B430 841204 Ava, B424 841117a Aracan & Ava, B292 820411b Cheduba, B433 841211b Ava, B440 841227 Ava, B107 741125b Negrais Harbour, B123 750228 Persaim River, B125 750320 Siriam River, B194 801017 Martavan River, B54 740205q Tavay River, B507 861005 Neptune, B427 841127 Negrais, B422 841101b Negrais, B423 841104 Negrais, B444 850113 Andaman Islands, B438 841218 Andaman, B432 841211a Andaman Islands, B435 841211d Stremhe, B439 841223 Andamans, B355 840101 Carnicobar Island, B505 860927 Carinicobar, B437 841217b Nicobar Islands, B448 850124 Nicobar Islands, B441 841229 Nicobar Islands, B307 820829a Camorta, and B308 820829b Noncowrey/Lindsay [together with] B309 820829c Noncowrey/Ritchie.

A third edition of the Collection, with its constituent parts, was published in 1807 (Catalogue A243).

Contents: i title; ii blank; iii-iv advertisement, dated by Dalrymple 1 March 1785 (iv); v-vi Preface, dated by Dalrymple 13 December 1784 (vi), and followed by a postscript announcing a memoir concerning a plan for making a survey of the Choromandel Coast (vi); 1-8 Memoir concerning a Survey of the Coast of Choromandel, dated by Dalrymple 13 December 1784 (8); 1-4 Introduction, commencing with an Advertisement dated by John Ritchie, Calcutta, 6 September 1783; 5-94 Snow Diligent on a cursory Survey of the Bay of Bengal

An Hydrographical Journal was first published in 1784 (Catalogue A93), and, apart from the initial omission of 'Memoir concerning a Survey of the Coast of Choromandel', was not significantly revised for the second edition. The second edition was issued, with Appendix to Capt. Ritchie's Survey of the Bay of Bengal 1785, second edition 1787
(Catalogue A132), under the collection title *Collection of Nautical Papers concerning the Bay of Bengal 1785*, second edition (Catalogue A130).

The 'Memoir concerning a Survey of the Coast of Choromandel' was omitted from the first issue of the second edition of *An Hydrographical Journal*, which was otherwise a straight re-setting which disregarded the distinction between preliminary and text pagination. The second issue, in which the second, third and fourth half-sheets (B² B*² B**²) were re-set to include the 'Memoir', has so far been found only in collections of Dalrymple letterpress with concentrations of Gregory imprints.

The plate of diagrams of signal flags was omitted from the second edition of *An Hydrographical Journal*.

A third edition of *An Hydrographical Journal* was published in 1807 (Catalogue A244).

Plates: Two plates of surveying diagrams giving a total of fifteen geometrical figures illustrating the text and linked to it by shoulder notes in the text:

[Seven diagrams of aspects of marine surveying, numbered 1 to 7.]
[Catalogue B22 710000g]

[Eight diagrams of aspects of marine surveying, numbered 8 to 15.]
[Catalogue B23 710000h]

The Essay was first published, as Essay on the Most Commodious Methods of Marine Surveying, in 1771 (Catalogue A14). The second edition published in 1786 (Catalogue A107) incorporated an introduction and minor revisions. The third edition was a simple re-setting of the second edition for Henry Gregory, with intentional changes made only to the title-page. The text was largely incorporated in the unpublished treatise Practical Navigation [1790] (Catalogue A175), before re-use in the new extended edition of Essay on Nautical Surveying in 1806 (Catalogue A232), which incorporated material from Dalrymple's other publications on navigation and surveying.

A sequence of events from 31 August 1787 to 13 February 1788 is narrated on pages 1 to 72, where Dalrymple claimed that time did not allow him to provide the recapitulation.

The postscript, headed 'Recapitulation', summarised the sequence of events from 31 August 1787, continuing the narrative to 28 February 1788, and recording in a footnote the result of the ballot on 1 March 1788.

Dalrymple treated Memoir concerning the Passages, At a late Season ... 1788 as supplementary to Memoir concerning the Passages to and from China 1782, second edition 1785 or third edition 1787 (Catalogue A96/A133), giving a survey with extracts from ships' journals to evaluate the passages. The Advertisement was used to rebut criticisms from George Robertson and to explain the difficulties in completing the Carimata Passage chart (Catalogue B187 800600).

Some copies of the Memoir are known with the map from Plan for Extending the Commerce of this Kingdom 1769 bound in, with an extension slip (Catalogue B10 690000c Eastern Asia).

Each version of Instructions is a complete re-setting of the text: the presence and length of the rules below the title are simple guides to differentiation of the issues of which examples have so far been identified.

Dalrymple brought together in Instructions information which he had issued in other leaflets between 1780 and 1787. The first two pages were taken from Instructions concerning the Chronometers ... sent to Bombay 1786 (Catalogue A112); pages 3 to 8 were a re-issue of Some Notes useful to those who have Chronometers at Sea [1780], with paragraphs 10-15 on pages 3 to 5 drawn from It is well-known that the Sun must come to the Meridien ... 1787. Pages 9 to 12 ('To find the Time by Observation of the Sun's Altitude') were taken from Some Notes useful.

It is by no means certain that examples have been found of all states of this pamphlet, which is known to have continued to be issued over Dalrymple's name in 1816.

Plate: One map:

MAP of the LANDS around The NORTH POLE by Dalrymple 1789. [Catalogue B593 890504]

First issue, with the text of the advertisement ending after 5 lines on page iv.

Second issue, with a slip of three additional paragraphs ('Having got Davis's Discoveries copied ... what is now called Hudson's Strait.') subscribed by Dalrymple, pasted over Dalrymple's name on page iv:

4°: A² B-F² [$1 signed]
12 leaves, pp. i-iii iv 1 2-20 [= iv, 20]

Contents: i title; ii blank; iii-iv Advertisement, dated 16 June 1789 (iii), with additional slip, and subscribed by Dalrymple; 1-20 text (begins 'This Map is chiefly, the Reduction of a Map on a larger Scale; ...'), dated 29 May 1789 (i)

Plate: One map, as in the first issue, but from the second state of the plate.

Third issue, with the title-page and advertisement re-set, the advertisement beginning with the text of the three paragraphs previously added on a slip, and finishing by summarising and amplifying parts of the original text:

MEMOIR of a MAP I of I The LANDS around The NÖRTH-PÔLE, I by I Dalrymple I 1789. | Scale 1/10 of an inch to 1°. of Latitude. | LONDON, | Printed by GEORGE BIGG, 1789.

4°: A²(1A²) B-F² [$1 signed]
12 leaves, pp. i-iii iv 1 2-20 [= iv, 20]
Like Plan for Promoting the Fur-Trade 1789, the Memoir was compiled primarily from information derived from Dalrymple's use of Hudson's Bay Company archives. Dalrymple described and evaluated the sources which Dalrymple used to compile the associated map. The map was a smaller-scale version of the map he had been compiling in support of his Plan, but which he had left unfinished for want of materials to finish it (see Catalogue B617 900000 Hudson's Bay).

In the advertisement in the first issue Dalrymple explained that he had been shown a copy of Meares' journal of his expedition to the northwest coast of America, but without permission to publish from it. For the second issue Dalrymple added the pasted slip giving the results of his examination of information copied from Molyneux's globe: this corresponds to the alterations to the depiction of Baffin's Bay in the second state of the map. In the advertisement in the third issue Dalrymple incorporated these notes, following them with an acknowledgement of charts and other journals, including that of Meares.

The title-page was re-set with the advertisement for the third issue. In the first issue 'by' in the fourth line is in the same size of type as 'of' in the second line: in the re-setting 'by' is in a larger size of type, similar to that of 'around' in the third line.

Dalrymple disputed, in the context of the Nootka Sound affair, the Spanish claims to the north-west coast of America by discovery.

For the extract from the Tosinus world map, as issued here, Dalrymple had the South America section cut from impressions taken from a plate
of the entire world map, which he had had engraved (see Catalogue B618 900000b World/Ptolemy).
CHARTS, AND PLANS, &c. [1789-1790] 1790

CHARTS, and PLANS, &c. published by Dalrymple, from 1st June, 1789, to 1st June, 1790.

4°: 1 leaf

1 leaf, pp. [2]

The list served as addenda to both List of Charts, Plans of Ports, &c. 1789 and Nautical Memoirs and Journals 1789. The list of addenda for year 11 [1789-90] comprised 7 charts, 22 plates of plans, and 2 letterpress memoirs. In some cases the sheet of addenda was cut into slips and pasted into the purchaser's copies of these lists. Charts and plans entered in this addenda list are indicated in Catalogue B with the notation 'CP 1789-90 [Year 11 addenda to LCPP 1789]'. Memoirs are indicated in Catalogue A with the notation 'CP 1790'.

LIST OF CLASSES INTO WHICH ARE DISTRIBUTED THE PLANS OF PORTS, &c. 1786 [YEAR 11 ADDENDA 1790]

4°: 1 leaf
1 leaf, pp. [2]

The list of addenda for year 11 [1789–90] comprised 22 plates of plans. It was designed to be cut into slips and pasted into the purchaser's copy of List of Classes into which are distributed the Plans of Ports &c. 1786. Plans entered in this addenda list are indicated in Catalogue B with the notation 'LCPP 1786, year 11 addenda [1789–90]'.
Dalrymple dismissed the Spanish note of 4 June 1790 in the Nootka Sound affair, as imperfectly understanding the justification of the British claim for satisfaction from Spain.
CONSIDERATIONS ON M. BUACHE'S MEMOIR CONCERNING NEW-BRITAIN

CP 1791: Considerations on M. Buache's Memoir, with Plates. @Dalrymple, 1790. Title Page, Advertisement 1 and 2, P. 1 to 12. 7s.6d.

Dalrymple's reply to criticisms by Buache, in Mémoires de l'Academie Royale des Sciences 1787, that he had disregarded the discoveries of Carteret, Bougainville and Surville in promulgating his 'Plan of Papua and part of New Britain'. Dalrymple pointed out that his map predated news of those discoveries, and was subsequently re-used by Forrest out of context.

CHAPTER I. | I. A CERTAIN Portion of Mathematical Knowledge | being requisite in every branch of Navigation; [...] 

4*: B-Z² Aa-Bb² [§1 signed]

50 leaves, pp. 1 2–32 35–98 [= 96]

Page numbering: 2 to 32 and 35 to 98 at outer end of running title line

Contents: 1–20 Chapter I; 21–32 and 35–42 Chapter II; 43–100 Chapter III

Notes: Proof sheets of three chapters of an unpublished work announced in the Advertisement in Essay on Nautical Surveying 1771, second edition 1786. The two known examples have no title-page or preliminary pages, no table to form pages 33–34, and nothing after page 98 (although page 98 has a catch to a Chapter IV).

Chapter I (pages 1 to 20) covers the basic mathematics necessary for navigation. Chapter II (pages 21 to 42), concerned with navigational terms, begins with geographical definitions common also to navigation (paragraphs 1–22), astronomical terminology (paragraphs 23–44), compass points (paragraphs 45–50), and climate and winds (paragraphs 51–76). In paragraphs 63–76 Dalrymple dealt with the question of recording wind strengths at sea, and gave the table of comparison with John Smeaton’s scale of winds at Austhorpe Mill, which formed the basis of his advocacy of a scale of winds in The East-India Company having thought proper to employ me 1779 (Catalogue A60).

CERTIFICATES AND CIRCUMSTANCES RELATIVE TO THE GOING OF
MR. ARNOLD'S CHRONOMETERS 1791

Certificates and Circumstances is attributed to Dalrymple on the basis of a comparison of its content with that of Longitude 1806 (Catalogue A226). Much of the evidence supporting Arnold's chronometers was supplied to Dalrymple by people known to have been his correspondents. Certificates printed information from Lestock Wilson's Journal of the Vansittart, which Dalrymple is known to have printed but not published in the early 1790s (Catalogue A229). The printer, George Bigg, employed Dalrymple's private '2D' logographs in the typesetting of Certificates.

The London Institution, before its dissolution, possessed, according to its printed library catalogue, an example of a second edition of Certificates and Circumstances. Neither this, nor any other example of a second edition, has since been traced.
CONTINUATION OF THE DESCRIPTION OF THE COAST OF MALABAR

Contents: [1]-[2] Catalogue of Printed Books and Tracts by @Dalrymple, before the 1st January 1792

A retrospective list of Dalrymple's non-nautical printed works, whether published or not, so far as he had examples available when compiling it. The list forms the basis of subsequent lists of his publications in The European Magazine and in posthumous biographical accounts. The list distinguishes between printed items sold, those issued but not sold, and those printed but never published.

Printed items entered in this list are indicated in Catalogue A by the notation 'CPBT 1792'.
CHARTS, VIEWS, AND PLANS, &c. [1791-1792] 1792

CHARTS, VIEWS, and PLANS, &c. published by @Dalrymple, from 1st June, 1791, to 1st June, 1792.

4*: 1 leaf

1 leaf, pp. [2]

The list served as addenda to List of Charts, Plans of Ports, &c. 1789. The list of addenda for year 13 [1791-92] comprised 1 chart, 1 plate of views of land, and 25 plates of plans. In some cases the sheet of addenda was cut into slips and pasted into the purchaser's copies of the List. Charts and plans entered in this addenda list are indicated in Catalogue B with the notation 'CVP 1791-92 [Year 13 addenda to LCPP 1789]'.

Notes: The text of the advertisement on page [3] reads: 'Mr Wingrave having expressed an opinion that an Edition of the Story of Dooshwanta and Sakoontala, in a Pocket Volume, would be acceptable to the Publick, and solicited my permission to print such an Edition; at his request, I have given that permission.'

For the second issue the catchword 'POSTSCRIPT.' on page 82 was overlaid in copies by a label with the catchword 'NOTES.' to page 99. No example has so far been found of an unmodified first issue: its make-up is inferred from the first edition (Catalogue A209) and the second issue of the second edition.

One example of the first state is known, with the postscript to the introduction, and with the cancelled leaves bound in at the end. The make-up of the first state is inferred from this example.

The postscript to the introduction indicates the reason for cancelling several leaves as the unwitting parallel publication of two collections of songs. Those identified as duplicated are: B₁, B₅, B₈, D₅, F₂, F₄, G₃ and G₄ (pages 17-18, 27-28, 31-32, 57-58, 83-84, 87-88 and 101-104). The songs deleted in this cancellation are:

Fool that I was, to venture to deny (Cowley) [from page 17]
That, which Her slender waist confin'd (Waller) [from page 27]
Would thy Shepherdess were here (Wither: The Prisoner's Wish) [from page 27]
When the trees are all bare, not a leaf to be seen (Vocal Music, 1772) [from page 58]
Cease, Celia, to accuse your Swain (Thurston) [from page 83]
Phillis, thus our time employing (Thurston) [from page 87]
Repeat your vows and breathe your sighs (‘W.H.’, 1745) [from pages 102-103]
The songs moved to other positions in the text are:
Phyllis, in your absence, I (Playford’s Choice Ayres, 1682) [from page 17 to page 155]
Love, when ‘tis true, needs not the aid (Sedley) [from page 18 to page 17]
Why so pale and wan, fond Lover? (Suckling) [from page 103 to page 27]
The new songs added to replace those deleted are:
Amintas is not, cant be false to me (Mrs A Behn’s Miscellanies, 1685) [page 17]
Spirit of Love and Sorrow hail! (Ann Radcliffe: To Melancholy, 1795) [page 18]
Love still has something of the Sea (Sedley) [page 32]
Form’d to attend in Silence, Shade and Ease (Inscription on a Seat, exposed to the Sun, at Whiston, Pembrokeshire, 1794) [page 58]
Serene is the morn, the Lark leaves his nest (Vocal Music, 1772) [page 83]
How sweet to wind the Forrest’s tangled shade (Ann Radcliffe: The First Hour of Morning, 1794) [page 87]
Behold the fatal hour arrive (Sir David Dalrymple, Metastatis) [pages 102-103]

A VOYAGE FROM ENGLAND TO THE RED-SEA 1806

A VOYAGE from ENGLAND to the RED-SEA, and along the EAST COAST of ARABIA to BOMBAY, by A Squadron under the Command of Commodore (afterwards Rear-Admiral) John Blankett, by Austin Bissell, R. N. 1798 & 1799. Published at the Charge of the East India Company, by Dalrymple. [spread rule 3.8 cm] LONDON: Printed by WILLIAM BALLINTINE, NO. 9, Duke-Street, York-Buildings, Strand. 1806.

Page numbering: ( ii ) to ( xii ), ( 2 ) to ( 80 ) and ( 82 ) to ( 84 ) centred above text

Contents: [1] title; [2] blank; i-xii Introduction, dated by Dalrymple 57 High Street, Marybone, May 1806 (xii, 85), reprinting official letters commendatory of Bissell; 1-80 An abstracted Journal of a Voyage from England to the Red Sea By a Squadron under the Command of Commodore (afterwards Rear-Admiral) Blankett: containing The many Struggles, to beat up the East Coast of Africa, against the Monsoon, and which obliged the Squadron, ultimately, to bear up for the Island of Zanzibar, to look for Refreshments. 1798 and 1799. By Austin Bissell (now) Captain in the Royal Navy; 80-84 Positions of Places determined in the years 1798, 1799, 1800, and 1808, on board H.M. Ships Daedalus, Leopard, and Babelmandel, by Austin Bissell (now) Captain in the Royal Navy; 85 Errata (dating Introduction to May 1806); 86 blank

As Hydrographer to the Admiralty Dalrymple was officially involved in the preparations for Blankett's expedition in 1797 and 1798, by assembling reference collections of his East India Company charts and journals.

Dalrymple published separately seven plates associated with Bissell's journal: Catalogue B1056 060531a Adaga Point, B1057 060531b Cossier, B1058 060531c Jeddah, B1060 060531e Mocha Road, B1064 060531i Tor Harbour, B1065 060531j Zanzibar, and B988 0040531a Africa/East Coast. These were not specifically called for in A Voyage, but are sometimes found bound with the letterpress.

Type ornaments: xii: three flowers; 36: three flowers; 52: two flowers

Contents: i title; ii Errata; iii-iv preface, dated by Dalrymple 31 May 1806 (iv); i-xii introduction, subscribed by Dalrymple (xii); 1-16 Geometrical Construction, for a chart of the Macklesfield Strait, subscribed by Wilson (16); 17-36 Of the relative Positions of Batavia, and the several Places in the Straits of Sunda, and from thence to Canton; 37-52 Bearings, from the several Stations, in the Vansittart from Java Head and the Brothers, to Batavia, by Captain Lestock Wilson. 1789

Pages i to xii and I to 52 were printed in the early 1790s, shortly after Wilson's report of the loss of the Vansittart reached London, but formal publication did not take place until 1806, when the title-page, errata and preface (pages i to iv) were added by Ballintine to the sheet stock of the earlier printing.

The introduction includes official instructions and memoranda enabling Vansittart to carry out an exploratory survey of the channels east of Banke en route to Canton.

Dalrymple published separately the chart from Wilson's voyage (Catalogue B695 920317 Banka), and three plates of views (Catalogue B895 000413 Vansittart views 1, Catalogue B898 000418a Vansittart views 2, and Catalogue B896 000415 Vansittart views 3.)

CNMJ 1806: M Memoir of a Chart of the N W Coast of Madagascar by Capt. David Inverarity, and Comoro Islands by the Honourable Thomas Howe. Already printed.

Dalrymple intended to supplement the Memoir with Howe's bearings and remarks for the Comoro Islands in 1766 in an appendix, but, though page 20 has the catchword 'APPENDIX.', but surviving examples end at that point. Robert Orme's copy in India Office Library bears the owner's manuscript note that no appendix was published.

Dalrymple published the chart separately, adding Howe's earlier outline of the Comoro Islands to Inverarity's representation of Madagascar: Catalogue B1071 061215 Madagascar. He called attention to this chart (page 1) as one of eight manuscripts which he had received from Inverarity. He published the other seven plans separately, and they were not otherwise connected with the Memoir: Catalogue B1040 060107 Passandava, B1051 060511b Nareends Bay, B1042 060211 Majambo Bay, B1048 060507a Bembatooka Bay, B1061 060531f Mozambique Harbour, B1055 060530 Inhamban, and B1050 060511a Delagoa Bay.

**CNMJ 1806: Essay on Nautical Surveying.** Already printed.

Dalrymple published here a further revision of *Essay on Nautical Surveying* 1771, second edition 1786 (Catalogue A107), together with 'Memoir concerning a Survey of the Coast of Choromandel' from *An Hydrographical Journal of a Cursory Survey of the Coasts and Islands of the Bay of Bengal* 1784, second 1787 (Catalogue A131), which he had previously expanded for *Practical Navigation* [1790] (Catalogue A175). On pages 27 to 32 he provided new text, giving a fuller explanation of his favoured method 'Of Surveying by Quincunx.' Pages 48 to 64 represent a revision of the explanation of chart construction and projections from *Practical Navigation* [1790] (Catalogue A175), chapter III, paragraphs 99-138. The section 'Form of Journals of the East India Company's Ships' (pages 65-72 of the first issue) was taken from *The East India Company having thought proper to employ me* 1779, with the journal forms printed by letterpress, not from engraved plates.

Dalrymple intended these leaves to serve as preliminaries for the publications resulting from his re-issuing of his nautical memoirs for the Admiralty in 1806. Collection includes a discussion of the selection of the nautical memoirs for reprinting, and a list of the works proposed eventually to be re-issued. Those which Dalrymple re-published between 1805 and his death are indicated in Catalogue A with the notation 'CNMJ 1806'. Many memoirs appear in Dalrymple's list, but are known only from earlier editions: it is to be assumed that these were candidates for re-publication, but had not yet been done when Dalrymple was dismissed in 1808.

COLLECTION OF NAUTICAL PAPERS CONCERNING THE BAY OF BENGAL
1785: Third edition 1807

The Collection was first published in 1785 (Catalogue A94), re-issued in a second edition in 1787 (Catalogue A130), and re-issued again in a third edition in 1807. The 'List of Plates' was revised at each re-issue, adding further new plates for the third edition.

The third edition of Collection of Nautical Papers was printed together with Hydrographical Journal of a Cursory Survey 1784, third edition 1807 (Catalogue A244) and Appendix to Capt. Ritchie's Survey 1785, third edition 1807 (Catalogue A245), and serves as a preface to the two items which form the collection.

The plans and charts specified in 'List of Plates concerning the Bay of Bengal ...' on pages [3]-[4] were not issued bound in the Collection, An Hydrographical Survey, or the Appendix. They were available individually to purchasers at Dalrymple's usual prices, and consequently the Collection is normally found without charts or plans.

The 54 plans and charts listed are: Catalogue B37 720915 Bay of Bengal, B434 841211c Choromandel, B391 840704 Choromandel, B284 820319b Kannaka & Codgone, B794 950807 Kannaka River, B466 851121a Bengal/Putnay, 851121b Megna River, B285 820319c Bomeeny, B428 841200 Chittigan, B456 850414 Islamabad, B452 850214b Chittigan, B425 841117b Arrackan & Chettigon, B453 850219 Chittigon, B446 850118 Khaut Colley, B436 841217a Arrackan, B1081 070402 Chittigon, B1075 070101a Chittigon, B447 850121 Arracan, B447 850121 Arracan, B426 841124 Aracan River, B39 740205b Aracan River, B431 841207 Aracan River, B942 020530a Aracan River, B450 850201 Aracan & Ava, B430 841204 Ava, B424 841117a Aracan & Ava, B292 820411b Cheduba, [Cheduba, i.e. Shedubba, P. Notes: The pamphlet is attributed to Dalrymple on the basis of autobiographical details in the text. Dalrymple argued for the appointment of Pigot as governor of Madras, against the candidacy of Thomas Rumbold.
LIST OF LOCATIONS

This is a representative list of the locations of examples of the letterpress works examined in the preparation of the catalogue. The list is arranged in the same order as the catalogue, using the same catalogue numbers and entry headings. A list of abbreviations for the names of libraries, archives and museums precedes the list of locations. Pressmarks and document references are given, so far as can be determined, in the forms preferred by the institutions themselves. Examples in private collections are included only where none are known in public collections, or where they add materially to the catalogue.
